

Weaver 2 Admin

Edit General Appearance and Layout

The screenshot displays the WordPress admin dashboard for a site named "Simon Doherty". The top navigation bar includes the site name, a user profile icon for "Howdy, admin", and a search icon. The main content area is titled "Simon Doherty" with the subtitle "Creative and Digital Marketing University College Cork". Below the title is a featured image of a purple thistle with a bee. A navigation menu includes links for "Home", "About Me", "Blog", "Contact Me", "Gallery", and "Sample Page". The main content area is currently empty, showing a "Page Content Area" placeholder. On the right side, there is a sidebar with a search box and several widget sections: "Recent Posts" (listing "Hello world!"), "Recent Comments" (listing "Mr WordPress on Hello world!"), "Archives" (listing "September 2012"), "Categories" (listing "Uncategorized"), and "Meta" (listing "Site Admin" and "Log out").

Select Appearance - Themes - Weaver 2 Admin

The screenshot displays the WordPress Admin dashboard. The left sidebar menu has 'Appearance' highlighted, with 'Themes' selected underneath. The main content area shows the 'Weaver II' theme details page. A red box highlights the 'Weaver II Theme' section, which includes a keyboard graphic, a description of the theme's features, and a list of options: 'Customize', 'Options: Widgets', 'Menus', 'Weaver II Admin', 'Shortcodes + Pro', 'Header', and 'Background'. Below this, the 'Available Themes' section shows three theme thumbnails: 'WordPress Classic', 'The WRC Theme Viewer', and 'Twenty Eleven'. The 'Twenty Eleven' theme is currently selected.

Weaver II Theme

Current Theme **Weaver II**
By [Bruce Wampler](#) | Version 1.1.7

The Weaver II theme is the easiest way to create your own perfect site design. Includes integrated Mobile device support that's second to none. Start with one of the many included sub-themes, then tweak away with the simple "checkbox" interface. Great for both newcomers AND pros. You can control virtually every aspect of your site – right down to individual pages if you need to. Make your header perfect. And at last, a mobile view that matches your site's regular style – automatically! Features include: context sensitive help; translations for than a dozen widely used languages, others easily translated; IE support; WP Multisite features; popular plugins supported; active support forum. Weaver II is simply one of the best themes available.

Weaver II Themes **Main Options** Advanced Options Admin Options Weaver II Pro Shortcodes/Plugins Save/Restore Help

Predefined Weaver II Sub-Themes ⓘ You can click the ⓘ's found throughout Weaver II admin pages for context specific help.

Welcome to Weaver II

Weaver II gives you extreme control of your WordPress blog appearance using the different admin tabs here. This tab lets you get a quick start by picking one of the many predefined sub-themes. Once you've picked a starter theme, use the Main Options and Advanced Options tabs to tweak the theme to be whatever you like. After you have a theme you're happy with, you can save it from the Save/Restore tab. The Help tab has much more useful information.

Get started by trying one of the predefined sub-themes!

Select a sub-theme: Select a predefined sub-theme from the list. Current theme: Blue

Note: Selecting a new theme will change only theme related settings. Most Advanced Options will be retained. You can use the Save/Restore tab to save a copy of all your current settings first.

Visit our [website](#) for even more sub-themes!

All the sub-themes included here provide a great starting point, but we're trying hard to make even more great looking sub-themes available for you to try. Click to check out our [Sub-Themes](#) page now on the main Weaver II website.

Sub-theme thumbnails

<p>Antique Ivory</p>	<p>Black And White</p>	<p>Blank Canvas</p>	<p>Blue</p>
<p>Browns</p>	<p>Dark 2 Left Sidebars</p>	<p>Dark With Green</p>	<p>Indie Ave</p>

In General Appearance tab, edit background and text colours

The screenshot shows the 'Weaver II 1.1.7 Options' page. The 'Main Options' tab is selected, and the 'General Appearance' sub-tab is active. The 'General Appearance' section is highlighted with a red box and contains the following settings:

- Outside BG: #C2CEFF
- Wrapper Page BG: #A8B4FF
- Default Text Color: #000000
- Main Area BG: #FCFCFC
- Container Area BG: transparent
- Rounded Corners:
- Rounded Corners (Content):
- Corner Radius:
- Fade Outside BG:
- Wrap site with shadow:

The 'Borders' section is also visible, with the following settings:

- Major Area Borders:
- Site Wrapper Border:

Below the 'Borders' section, there are 'Border Attributes' settings:

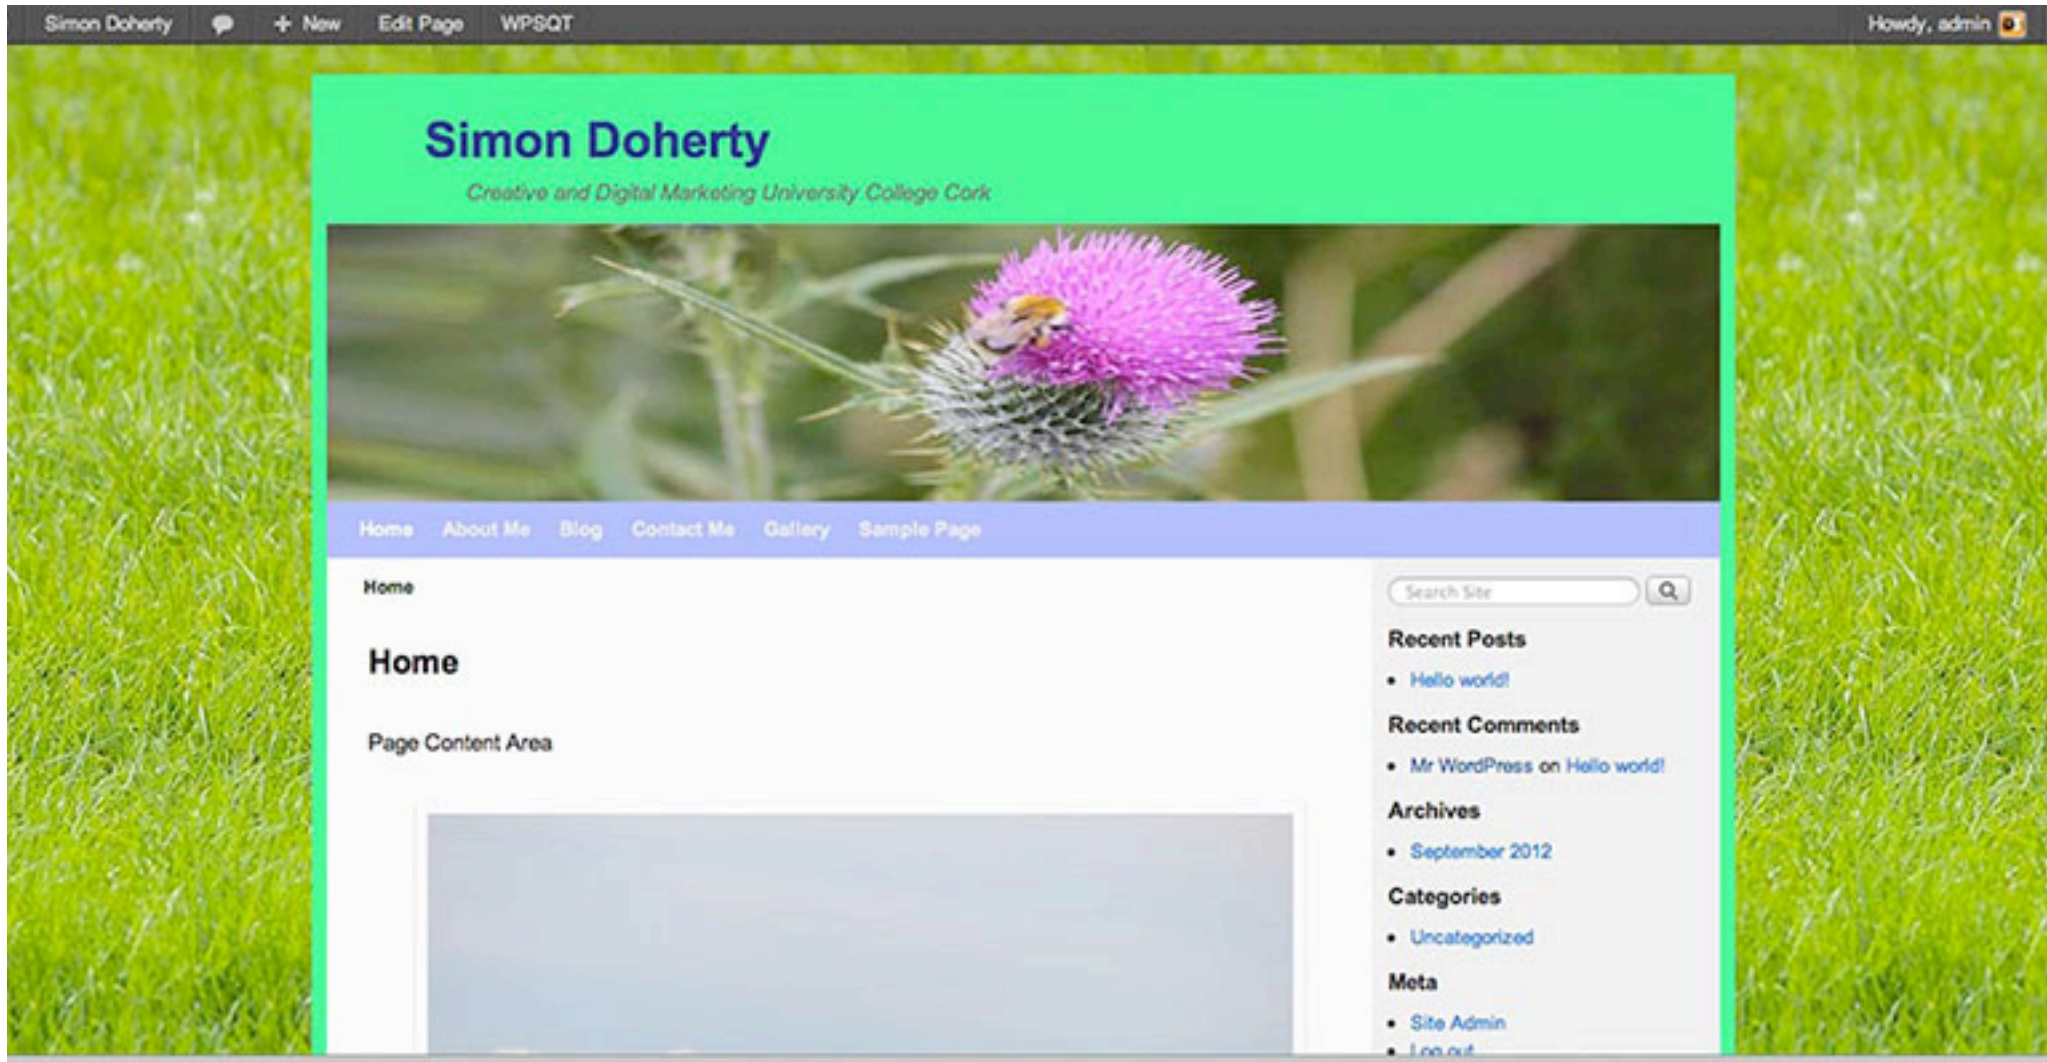

- Border Color: Pro Version
- Border Width: Pro Version

The right side of the page contains descriptive text for each setting, such as: 'Background color that wraps entire page. (<body>) Using Appearance->Background will override this value, or allow a background image instead.'

Choose colours from the colour window box, select Save Settings

The screenshot shows the WordPress dashboard for Simon Doherty, with the 'Appearance' menu selected. The 'Weaver II 1.1.7 Options' page is open, displaying the 'Main Options' tab. The 'General Appearance' sub-tab is active. A red circle highlights the 'Save Settings' button. Another red circle highlights a color picker window that is open over the 'Main Area BG' field, showing a rainbow color spectrum. The 'Main Area BG' field currently displays the hex code #40FF99. Other visible settings include 'Outside BG' (#7CFF6E), 'Wrapper Page BG' (#40FF99), 'Default Text Color', 'Container Area BG', 'Rounded Corners', and 'Borders'.

The Wrapper border colour is changed

Choose Rounded Corners, Fade Outside BG or Wrap site with shadow

The screenshot shows the 'Weaver II 1.1.7 Options' page in a WordPress admin dashboard. The 'General Appearance' tab is selected, and the 'Rounded Corners' and 'Wrap site with shadow' options are highlighted with a red box. The 'Rounded Corners' option is checked, and the 'Wrap site with shadow' option is also checked. The 'Corner Radius' is set to 10. The 'Fade Outside BG' option is unchecked. The 'Wrapper Page BG' is set to #40FF99, and the 'Main Area BG' is set to #FCFCFC. The 'Container Area BG' is set to #FFFFFF. The 'Default Text Color' is set to #012001. The 'Major Area Borders' and 'Site Wrapper Border' options are unchecked. The 'Border Attributes' section shows 'Border Color' and 'Border Width' both set to 'Pro Version'.

Rounded Corners:

Rounded Corners (Content):

Corner Radius: 10

Fade Outside BG:

Wrap site with shadow:

Borders

Major Area Borders:

Site Wrapper Border:

For Widget Areas:

Border Attributes

Border Color: Pro Version

Border Width: Pro Version

Overall settings that affect content and widget areas

Background color that wraps entire page. (tbody) Using Appearance->Background will override this value, or allow a background image instead.

Background for top level #wrapper div - default BG if you don't change others.

Default text color (tbody). Most areas will override this color with their own color.

Background for main page #main div - wraps container, content and sidebars (uses wrapper bg if not set).

Background for #container div - wraps content and sidebars (Uses wrapper bg if not set).

Check to use rounded corners for main area, menu bars, widgetareas, header and footer

Check to use rounded corners for content area (page and post content)

Controls how "round" corners are. Specify a value (5 to 15 look best) for corner radius. (Default: 10)

Will fade the Outside BG color, darker at top to lighter at bottom.

Will wrap site's main area with a shadow

Border Attributes for various areas

Check to include border around site wrapper area and all sidebars.

Check to include border around site wrapper area (Major Area Borders also includes this border)

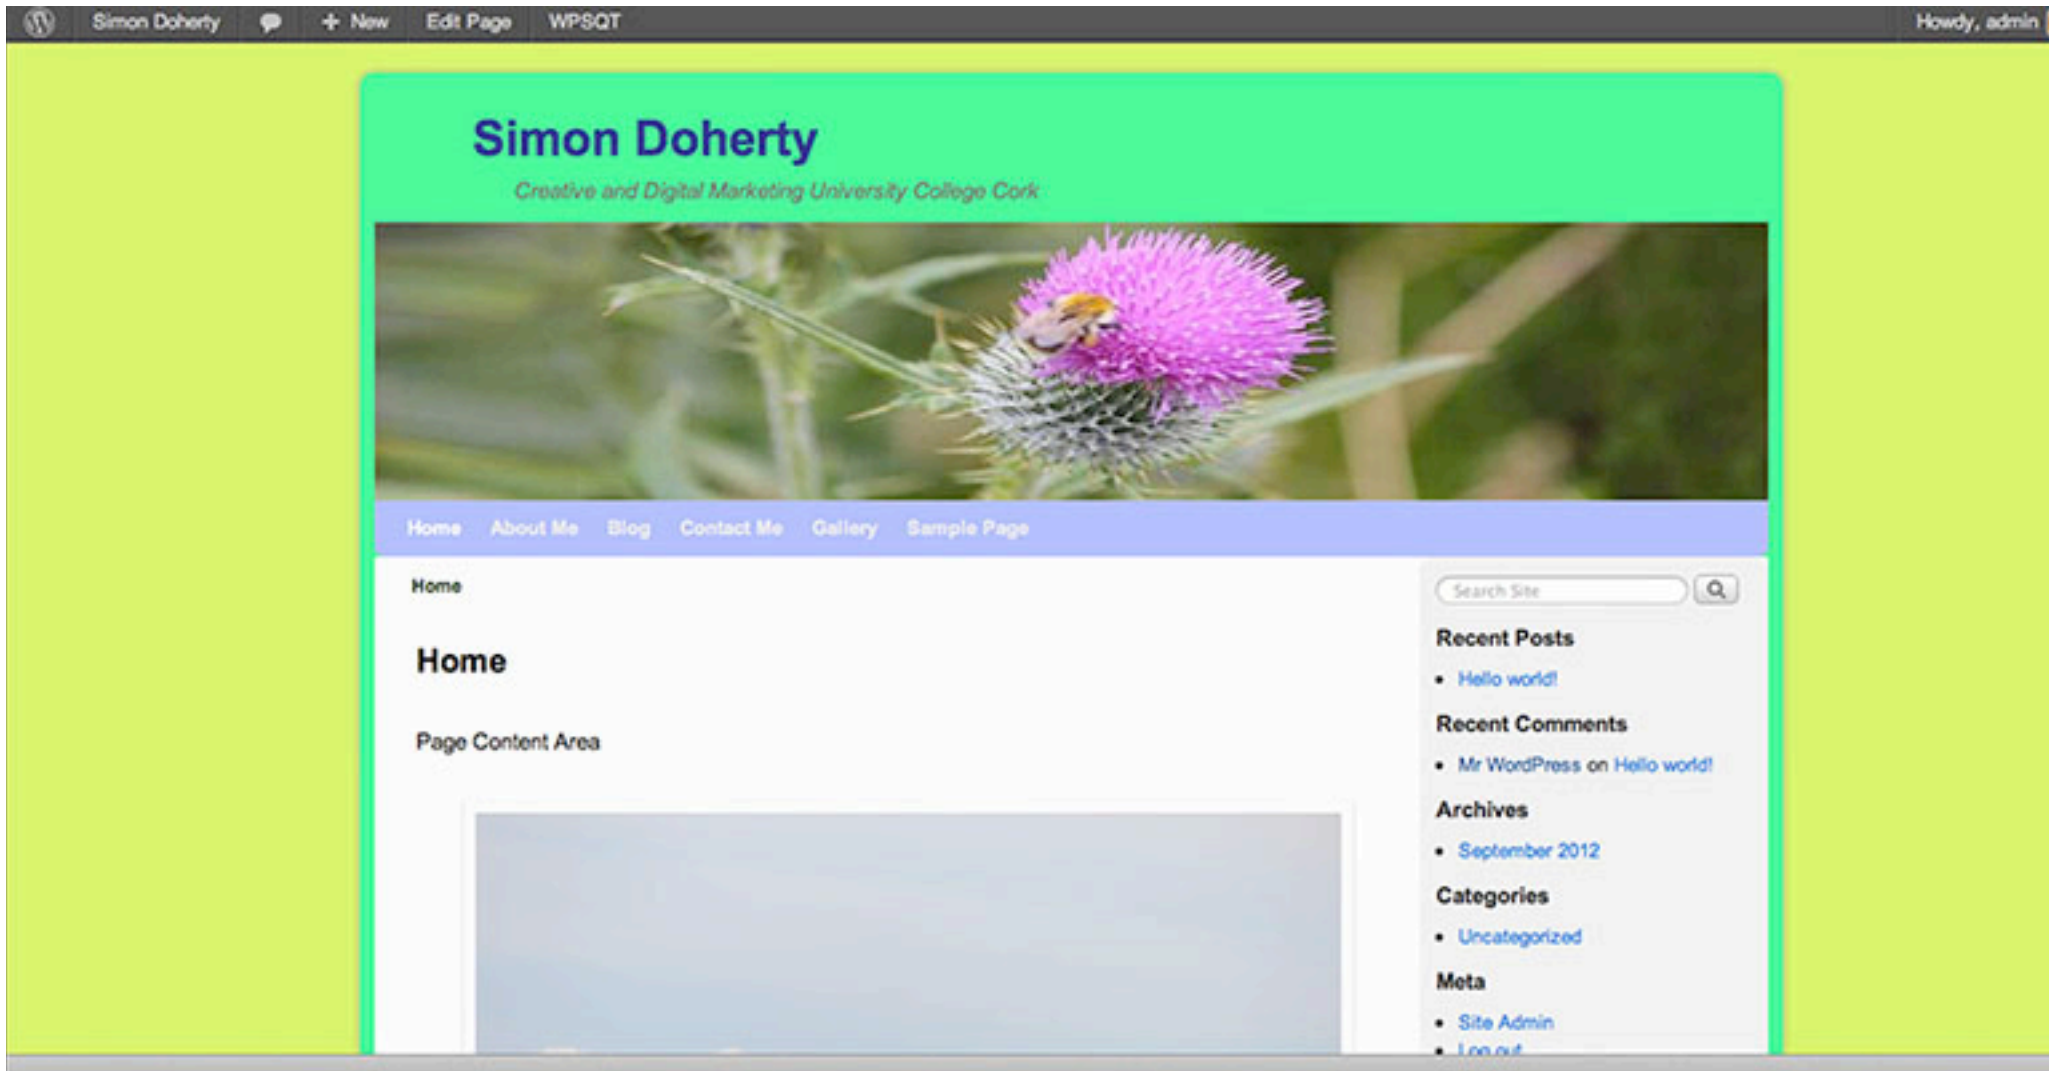

You can set borders for individual widget areas from the Widget Areas tab

Border attributes apply to all areas set to show border

Color of borders. (Default: #222) (Pro)

Width of borders. (Default: 1px) (Pro)

The Borders are rounded, the site has a shadow

The image shows a screenshot of a WordPress website for Simon Doherty. The website is displayed within a rounded rectangular frame that has a subtle drop shadow, set against a light green background. The website's header is a solid green bar containing the name "Simon Doherty" in a dark blue font, followed by the subtitle "Creative and Digital Marketing University College Cork" in a smaller, italicized font. Below the header is a large, square image of a purple thistle flower with a bee on it. Underneath the image is a light blue navigation bar with links for "Home", "About Me", "Blog", "Contact Me", "Gallery", and "Sample Page". The main content area is white and features a "Home" heading, a "Page Content Area" label, and a large, empty rectangular box. On the right side, there is a sidebar with a search box labeled "Search Site", and several widget sections: "Recent Posts" with a link to "Hello world!", "Recent Comments" with a link to "Mr WordPress on Hello world!", "Archives" with a link to "September 2012", "Categories" with a link to "Uncategorized", and "Meta" with links to "Site Admin" and "Log out". The top of the browser window shows the WordPress logo, the site name "Simon Doherty", and the user name "Howdy, admin".

Creative and Digital Marketing University College Cork

Home About Me Blog Contact Me Gallery Sample Page

Home → Sample Page

Sample Page

This is an example page. It's different from a blog post because it will stay in one place and will show up in your site navigation (in most themes). Most people start with an About page that introduces them to potential site visitors. It might say something like this:

Hi there! I'm a bike messenger by day, aspiring actor by night, and this is my blog. I live in Los Angeles, have a great dog named Jack, and I like piña colodas. (And gettin' caught in the rain.)

...or something like this:

The XYZ Doohickey Company was founded in 1971, and has been providing quality doohickies to the public ever since. Located in Gotham City, NY, their slogan is "Gotham City Sucks!" and they're on the verge of a IPO.

Another method to control sidebars is found on Pages

The screenshot displays the WordPress admin dashboard for user Simon Doherty. The left sidebar contains various menu items, with 'Pages' highlighted in a red box. Below 'Pages', 'All Pages' is also highlighted. The main content area shows the 'Pages' management screen with a list of pages. The 'Home' page is highlighted with a red box, showing its title, edit, link, and trash options. The 'Home' page is currently set as the site's front page.

<input type="checkbox"/>	Title	Author
<input type="checkbox"/>	About Me	admin
<input type="checkbox"/>	Blog	admin
<input type="checkbox"/>	Contact Me	admin
<input type="checkbox"/>	Gallery	admin
<input type="checkbox"/>	Home	admin
<input type="checkbox"/>	Sample Page	admin
<input type="checkbox"/>	Title	Author

Select a Page and scroll down

The screenshot shows the WordPress 'Edit Page' interface. At the top, the user is identified as 'Simon Doherty' and the page title is 'Home'. The left sidebar contains navigation links for Dashboard, Posts, Media, Links, Pages, All Pages, Comments, FAQs, Contact, Appearance, Plugins, Users, Tools, Settings, Gallery, Select Sociable Plugin, and WPSQT. The main content area features a rich text editor with a toolbar and a 'Page Content Area' containing a placeholder image. A large red arrow points downwards from the text 'Scroll Down' towards the bottom of the page. The right sidebar includes sections for 'Publish' (with 'Preview Changes' and 'Update' buttons), 'Page Attributes' (with 'Parent', 'Template', and 'Order' dropdowns), and 'Disable sociable' (with a checkbox and a note). The bottom of the page shows 'Weaver II Options For This Page' and 'Page Templates'.

The screenshot displays the WordPress 'Edit Page' interface for a page titled 'Home'. The top navigation bar includes the user name 'Simon Doherty', a '+ New' button, and links for 'View Page', 'Gallery', and 'WPSQT'. The user profile 'Howdy, admin' is visible in the top right corner. The left sidebar contains a menu with 'Dashboard', 'Posts', 'Media', 'Links', 'Pages', 'All Pages', 'Comments', 'FAQs', 'Contact', 'Appearance', 'Plugins', 'Users', 'Tools', 'Settings', 'Gallery', 'Select Sociable Plugin', and 'WPSQT'. The main content area shows the page title 'Home', a permalink, and a rich text editor with a toolbar. The 'Page Content Area' contains a large image placeholder. The right sidebar features several panels: 'Publish' with a 'Preview Changes' button and a red-circled 'Update' button; 'Page Attributes' with dropdowns for 'Parent' and 'Template'; and 'Disable sociable' with a checkbox. The bottom of the page shows 'Weaver II Options For This Page' and 'Page Templates' information.

The sidebars appear on the Left and Right

Sample Page

This is an example page. It's different from a blog post because it will stay in one place and will show up in your site navigation (in most themes). Most people start with an About page that introduces them to potential site visitors. It might say something like this:

Hi there! I'm a bike messenger by day, aspiring actor by night, and this is my blog. I live in Los Angeles, have a great dog named Jack, and I like piña coladas. (And gettin' caught in the rain.)

Select Appearance - Widgets to view the contents of the sidebars

The screenshot shows the WordPress Admin Dashboard. The left sidebar contains the main navigation menu, with 'Appearance' and 'Widgets' highlighted in red. The main content area is titled 'Widgets' and displays a grid of 'Available Widgets'. The right sidebar shows the 'Primary (top) Sidebar' widget area, which is also highlighted in red. This sidebar contains several widget slots, each with a dropdown arrow indicating the widget currently assigned to that slot.

Available Widgets:

- Archives:** A monthly archive of your site's posts
- Calendar:** A calendar of your site's posts
- Categories:** A list or dropdown of categories
- Custom Menu:** Use this widget to add one of your custom menus as a widget.
- Links:** Your blogroll
- Meta:** Log in/out, admin, feed and WordPress links
- NextGEN Media RSS:** Widget that displays Media RSS links for NextGEN Gallery.
- NextGEN Slideshow:** Show a NextGEN Gallery Slideshow
- NextGEN Widget:** Add recent or random images from the galleries
- Pages:** Your site's WordPress Pages
- Recent Comments:** The most recent comments
- Recent Posts:** The most recent posts on your site
- RSS:** Entries from any RSS or Atom feed
- Search:** A search form for your site
- Simple QR Code:** Simple QR Code
- Tag Cloud:** Your most used tags in cloud format
- Text:** Arbitrary text or HTML
- Top Scores:** Top Scores
- Weaver II Login:** Log in/out, admin
- Weaver II Text 2:** Text Widget with Two Columns - with HTML and shortcode support. Also adds shortcodes to standard Text widget.
- WP UI Posts:** Implement your posts automatically as tabs, sliders, accordions or spoilers.
- WP UI Widget:**

Primary (top) Sidebar:

- Search
- Recent Posts
- Recent Comments
- Archives
- Categories
- Meta

Other Sidebar Areas:

- Upper/Right Sidebar
- Lower/Left Sidebar
- Mobile Device Widget Area
- Header Horizontal Widget Area

To add more widgets to the sidebars, select the drop down arrow to open the widget box, drag and drop widgets into the boxes

The screenshot shows the WordPress 'Appearance' > 'Widgets' screen. The left sidebar contains a grid of widget categories: NextGEN Media RSS, NextGEN Slideshow, NextGEN Widget, Pages, Recent Comments, Recent Posts, RSS, Search, Simple QR Code, Tag Cloud, Text, Top Scores, Weaver II Login, Weaver II Text 2, and WP UI Posts. The right sidebar shows a list of widget areas: Upper/Right Sidebar, Lower/Left Sidebar (highlighted with a red box), Mobile Device Widget Area, Header Horizontal Widget Area, Sitewide Top Widget Area, Sitewide Bottom Widget Area, and Pages Top Widget Area. The Lower/Left Sidebar area is expanded, showing a dropdown menu with 'Categories' and 'Archives' options. Red arrows point from the 'Recent Comments', 'Recent Posts', and 'Tag Cloud' widgets to the Lower/Left Sidebar area. A red box highlights the 'Lower/Left Sidebar' area and its dropdown menu. A red arrow also points from the top text to the dropdown arrow of the Lower/Left Sidebar area.

Drag and Drop widgets into Widget Area boxes

To change the Sidebar Width, select Appearance, Weaver 2 Admin, Main Options, Layout and scroll down

The screenshot shows the WordPress admin interface for the Weaver II 1.1.7 theme. The left sidebar contains the navigation menu, with 'Appearance' and 'Weaver II Admin' highlighted. The main content area is titled 'Weaver II 1.1.7 Options' and features a top navigation bar with 'Main Options' and 'Layout' highlighted. Below this, the 'Main Options' section is active, showing settings for 'Layout'. The 'Layout' section includes options for 'Theme Width' (set to 1000 px), 'Theme Margins' (Top/Bottom and Left/Right), and 'Wrapper Padding'. A large red arrow points downwards from the text 'Scroll Down' on the right side of the page.

Settings for site layout: theme width and margins, sidebar layout, bg color flow

Change Theme Width. Standard size is 940px. Header Image width is automatically changed, too. Does not include wrapper padding. (Uses CSS "max-width" to set width, which gives "flexible width" shrinking for displays smaller than the width specified.)

Force the theme width to be fixed (use CSS "width" instead of "max-width"). Using this option is not recommended. This setting will also "break" the Mobile View, so you should disable Mobile Support as well.

Top and bottom margins around whole site. (Default: 20px)

Left and right margins around whole site. (Default: 20px)

Wrapper Padding - space between wrapper edges and header, content, sidebars, footer. (Default: 10px)

Sidebar Layout for each type of page

Select the default theme layout for blog, single post, and pages.

Select the default theme layout for all other pages - archives, search, etc.

Layout for normal Pages on your site.

Layout for main blog page. Includes "Page with Posts" Page templates.

Layout for Posts displayed as a single page.

Layout for archive pages on your site. Used for all archive-like pages unless otherwise specified. (Pro)

Layout for category archive pages. (Pro)

Layout for tag archive pages. (Pro)

Layout for author archive pages. (Pro)

The screenshot shows the WPSTQ settings interface. At the top, there are navigation tabs: a speech bubble icon, '+ New', 'Gallery', and 'WPSTQ'. Below the tabs, the text 'Background: Pro Version' is visible. On the left side, there is a 'Save Settings' button. Underneath it, the section 'Sidebar Wrappers Properties' is expanded. The first item is 'Default Width for Sidebars', which has a text input field containing the number '40' followed by a '%' symbol. This input field is highlighted with a red rectangular box. A red arrow points upwards from the bottom of the page towards this input field. Below this, there are several other sidebar wrapper settings, each with 'Sidebar Width' and 'Background' options, all set to 'Pro Version'. These include 'Right Side, One Column', 'Left Side, One Column', 'Right Side, Two Column', 'Left Side, Two Column', and 'Two Column - Left/Right'. At the bottom, there is a 'Split Sidebars' section with 'Sidebar Width - Left', 'Sidebar Width - Right', and 'Background - Left' options, all set to 'Pro Version'. On the right side of the page, there is a 'Note' about container width calculation. Below the note is a section titled 'Widths, Background, and Column Color Flow of Sidebars' which lists various wrapper areas and their default widths and background colors. At the bottom of the page, the text 'Scroll Up' is written in large, red, bold letters.
