Weaver 2 Admin

Select Main Options - Fonts

The screenshot displays the Weaver II 1.1.7 Admin interface. The top navigation bar includes the user name 'Simon Doherty', a '+ New' button, and a 'Gallery' tab. The main content area is titled 'Weaver II 1.1.7 Options' and features a yellow notification box stating 'Weaver II Settings Saved.' Below this, a horizontal menu contains tabs for 'Main Options', 'Advanced Options', 'Admin Options', 'Weaver II Pro', 'Shortcodes/Plugins', 'Save/Restore', and 'Help'. The 'Main Options' tab is selected and highlighted with a red box. Underneath, a sub-menu includes 'General Appearance', 'Layout', 'Fonts', 'Widget Areas', 'Header', 'Menus', 'Links', 'Content Areas', 'Post Specifics', and 'Footer'. The 'Fonts' sub-tab is also selected and highlighted with a red box. The 'Main Options' section contains a 'Save Settings' button and a description: 'Define Fonts for Content and Titles, as well as base Font Size and Line Spacing. Pro Version supports setting fonts for specific objects, as well as using Google Fonts.' The 'Fonts' section is divided into two columns. The left column contains 'Content Font' (set to 'Arial,Helvetica,sans-serif'), 'Titles Font' (set to 'Arial,Helvetica,sans-serif'), 'Site Base Font Size' (set to '11 px'), and 'Site Base Line Height' (empty). The right column contains 'Fonts' (set to 'Arial,Helvetica,sans-serif'), 'Font used for most content and widget text (Default: "Times New Roman", Times, serif.)', 'Font used for post, page, and widget titles, info labels, and menus. (Default: "Helvetica Neue", Helvetica, A', 'Set the Base Font size. All other font sizes are calculated as a percentage of this size. (Default: 12px)', and 'Set the Base line-height. Most other line heights based on this multiplier. (Default: 1.5 - no units)'. The 'Weaver II Admin' menu item in the left sidebar is highlighted with a red box. At the bottom, the 'Weaver II Pro Font Control' section is visible, with a 'Save Settings' button.

Set the Base line-height. Most other line heights based on this multiplier. (Default: 1.5 - no units)

Weaver II Pro Font Control

The Weaver II Pro Font Control panel gives you fine tuned control over the fonts various elements of your site will use. You can use a set of standard Web fonts, or for total flexibility use [Google Fonts](#). In addition to the two general areas available in the basic Weaver II version, the Pro version lets you set the font of virtually every text element on your site. You can also set the font of individual elements.

Select a font style from the Content Font menu

The screenshot shows the WordPress admin interface for the Weaver II 1.1.7 theme. The left sidebar contains navigation menus for Dashboard, Posts, Media, Links, Pages, Comments, FAQs, Contact, Appearance, Plugins, Users, and Tools. The main content area is titled 'Weaver II 1.1.7 Options' and includes a 'Weaver II Settings Saved.' notification. The 'Main Options' tab is active, and the 'Content Font' dropdown menu is open, displaying a list of font options. The option 'Comic Sans MS, Arial, sans-serif' is highlighted with a red box. Other font options include Helvetica Neue, Arial, Verdana, Tahoma, Arial Black, Impact, Trebuchet, Century Gothic, Lucida Grande, Univers, Times New Roman, Bitstream Charter, Georgia, Palatino, Bookman, Garamond, Courier New, and Andale Mono. The 'Save Settings' button is visible at the bottom of the page.

Select Save Settings

The screenshot shows the WordPress admin dashboard for a user named Simon Doherty. The main content area is titled "Weaver II 1.1.7 Options" and displays a yellow notification box stating "Weaver II Settings Saved." Below this, there are several tabs for configuration: Weaver II Themes, Main Options (selected), Advanced Options, Admin Options, Weaver II Pro, Shortcodes/Plugins, Save/Restore, and Help. Under the "Main Options" tab, there are sub-tabs for General Appearance, Layout, Fonts (selected), Widget Areas, Header, Menus, Links, Content Areas, Post Specifics, and Footer. The "Fonts" section is active, showing settings for Content Font, Titles Font, Site Base Font Size (set to 11 px), and Site Base Line Height. A red circle highlights the "Save Settings" button. Below the "Fonts" section, there is a "Weaver II Pro Font Control" section with its own "Save Settings" button.

Sample Page

This is an example page. It's different from a blog post because it will stay in one place and will show up in your site navigation (in most themes). Most people start with an About page that introduces them to potential site visitors. It might say something like this:

Hi there! I'm a bike messenger by day, aspiring actor by night, and this is my blog. I live in Los Angeles, have a great dog named Jack, and I like piña coladas. (And gettin' caught in the rain.)

...or something like this:

The XYZ Doohickey Company was founded in 1971, and has been providing quality doohickies to the public ever since. Located in Gotham City, XYZ employs over 2,000 people and does all kinds of awesome things for the Gotham community.

As a new WordPress user, you should go to [your dashboard](#) to delete this page and create new pages for your content. Have fun!
