Sample Page

This is an example page. It's different from a blog post because it will stay in one place and will show up in your site navigation (in most themes). Most people start with an About page that introduces them to potential site visitors. It might say something like this:

Hi there! I'm a bike messenger by day, aspiring actor by night, and this is my blog. I live in Los Angeles, have a great dog named Jack, and I like piña coladas. (And gettin' caught in the rain.)

Select Appearance - Weaver 2 Admin - Main Options - Widget Areas

The screenshot displays the Weaver II 1.1.7 Admin interface. The top navigation bar includes 'Simon Doherty', '+ New', 'Gallery', and 'WPSQT'. A sidebar on the left contains menu items: Dashboard, Posts, Media, Links, Pages, Comments, FAQs, Contact, Appearance (highlighted with a red box), Themes, Widgets, Menus, Weaver II Admin (highlighted with a red box), Shortcodes + Pro, Header, Background, Editor, Plugins, Users, Tools, Settings, and Gallery. The main content area is titled 'Weaver II 1.1.7 Options' and features a 'Weaver II Settings Saved.' message. Below this is a tabbed interface with 'Main Options' (highlighted with a red box) selected. Under 'Main Options', the 'Widget Areas' sub-tab (also highlighted with a red box) is active. A tooltip points to the 'Widget Areas' sub-tab with the text: 'Backgrounds, margins, borders, text colors of widgets and widget areas'. The 'Main Options' section includes a 'Save Settings' button and a description: 'Options affecting Widget Areas. This includes properties of Widgets, as well as properties of various Widget Areas. This is also where you can define new Per Page Widget Areas.' The 'Widget Areas' section is divided into 'Individual Widgets' and 'Settings affecting widget areas'. The 'Individual Widgets' settings include: Background (with a CSS+ icon), Top/Bottom Margins (T: [] px B: [] px), Add Border (checkbox), Widget Padding ([] px), Widget Title (with a CSS+ icon and a black background), Bar under Widget Titles ([] px), Widget Area Text (with a CSS+ icon and a black background), and Widget List Bullet (Filled Disc (default)). The 'Settings affecting widget areas' section includes: Properties for individual widgets (e.g., Text, Recent Posts, etc.), Individual Widgets: Background Color (use CSS+ to specify custom borders!), Individual Widgets: Top and bottom margin (space between areas, default: T:0px B:10px), Individual Widgets: Add the "standard" border (as set on General Appearance tab), Padding used around all sides of individual widgets. Not usually needed unless widgets have bg color., Color for Widget titles and labels., Enter size in px if you want a bar under Widget Titles. Leave blank or 0 for no bar., Color for widget area content (text color)., Bullet used for Unordered Lists in Widget areas, and URL for "Custom" bullet image (Pro). At the bottom, there is a 'Save Settings' button and a note: 'Sidebar Widths: Widths of Sidebars set under Layout tab.'

The image shows a screenshot of a WordPress dashboard. At the top, there is a navigation bar with a speech bubble icon, a '+ New' button, and 'Edit Page' and 'WPSQT' links. Below this, the breadcrumb 'Home → Sample Page' is visible. The main content area features a 'Sample Page' with a title and a paragraph of text. A quote is displayed in italics. Below the quote, there is another paragraph of text. At the bottom of the main content, there is a call to action and a social sharing prompt. On the right side, there is a sidebar with several widgets. The titles of these widgets are highlighted with red boxes: 'Recent Posts', 'Recent Comments', 'Meta', and 'Categories'. The 'Recent Posts' widget contains one item: 'Hello world!'. The 'Recent Comments' widget contains one item: 'Mr WordPress on Hello world!'. The 'Meta' widget contains five items: 'Site Admin', 'Log out', 'Entries RSS', 'Comments RSS', and 'WordPress.org'. The 'Categories' widget contains one item: 'Uncategorized'.

The background colour of the header is changed

The image shows a screenshot of a WordPress website's header. The header has a green background and is enclosed in a red border. The text in the header reads "Simon Doherty" in a large, bold, blue font, followed by "Creative and Digital Marketing University College Cork" in a smaller, italicized, blue font. Below the header is a large image of a purple thistle flower with a bee on it. A light blue navigation bar contains the links "Home", "About Me", "Blog", "Contact Me", "Gallery", and "Sample Page". Below the navigation bar, the breadcrumb "Home → Sample Page" is visible. The main content area features the heading "Sample Page" and a paragraph of text. On the right side, there is a sidebar with a search box, a "Recent Posts" section with one post titled "Hello world!", and a "Recent Comments" section.

The image shows a screenshot of a WordPress website. At the top, there is a dark grey header with the text '+ Now', 'Edit Page', and 'WPSQT'. Below this is a large banner image of a purple thistle with a bee. The text 'Simon Doherty' is written in a large, white, serif font, and 'Creative and Digital Marketing University College Cork' is written in a smaller, white, italicized serif font below it. A red rectangular box highlights a green horizontal navigation menu located below the banner. The menu contains the following items: 'Home', 'About Me', 'Blog', 'Contact Me', 'Gallery', and 'Sample Page'. Below the menu, the main content area is visible, starting with the text 'Home' and 'Home' in a large, bold, black font. Below this is a 'Page Content Area' which is currently blank. On the right side of the page, there is a sidebar with a search box labeled 'Search Site' and a magnifying glass icon. Below the search box are two sections: 'Recent Posts' with a list item 'Hello world!' and 'Recent Comments' with a list item 'Mr WordPress on Hello world!'.

Custom Menus

To create a new Custom Menu, select Appearance - Menus

The screenshot displays the WordPress admin dashboard for user Simon Doherty. The top navigation bar includes 'Simon Doherty', '4' notifications, '+ New', 'Gallery', and 'WPSQT'. The left sidebar contains the main navigation menu with 'Appearance' highlighted. Under 'Appearance', 'Menus' is also highlighted. The main content area shows the 'Menus' section with a 'Menu Name' field containing 'extra menu'. Below this, there are instructions: 'To create a custom menu, give it a name above and click Create Menu. Then choose items like pages, categories, and links. After you have added your items, drag and drop to put them in the order you want. You can also click each item to edit it. When you have finished building your custom menu, make sure you click the Save Menu button.' The 'Custom Links' section has a URL field with 'http://', a label field with 'Menu Item', and an 'Add to Menu' button. The 'Pages' section has a list of pages with checkboxes: 'About Me', 'Submenu Page', 'Contact Me', 'Gallery', 'Blog', 'Home', and 'Sample Page', with an 'Add to Menu' button at the bottom.

**In the Menus Section,
enter a name in the Menu
Name text field**

In the Menus Section, enter a name in the Menu Name text field and select Create Menu

The screenshot shows the Drupal administration interface for the Menus section. At the top right, the user is logged in as 'admin' with the text 'Howdy, admin' and a user icon. Below this are 'Screen Options' and 'Help' buttons. The main content area features a '+ Menu Name' section with a text input field containing 'extra menu'. A red circle highlights this text field. To the right of the input field is a blue 'Create Menu' button, also highlighted with a red circle. Below the input field, there is instructional text: 'To create a custom menu, give it a name above and click Create Menu. Then choose items like pages, categories or custom links from the left column to add to this menu. After you have added your items, drag and drop to put them in the order you want. You can also click each item to reveal additional configuration options. When you have finished building your custom menu, make sure you click the Save Menu button.'

In the Menus Section, to add new pages to the menu, scroll down to the Pages section

The screenshot shows the WordPress dashboard's 'Menus' section. At the top, there's a 'Custom Links' section with a form for adding a new link. Below it, the 'Pages' section is highlighted with a red border. This section contains a list of pages with checkboxes: 'About Me' (checked), 'Contact Me' (checked), 'Gallery' (checked), 'Blog' (checked), 'Home' (checked), and 'Sample Page' (unchecked). Below the list are 'Select All' and 'Add to Menu' buttons. The 'Add to Menu' button is circled in red. A red arrow points from the 'Custom Links' section down to the 'Pages' section, with the text 'Scroll Down' next to it.

The screenshot shows the WordPress 'Menus' interface. At the top, there's a navigation bar with 'New', 'Gallery', and 'WPSQT' tabs, and a user profile 'Howdy, admin'. Below this, the 'Menus' section is active. On the left, there are 'Theme Locations' and 'Custom Links' panels. The main area shows a menu named 'extra menu' with a 'Save Menu' button circled in red. The menu items are: Home, About Me, Gallery, Blog, and Contact Me. Each item has a 'Page' dropdown menu. Red boxes highlight the 'Home' and 'Contact Me' items, and red double-headed arrows indicate they can be dragged to reorder the menu. A red box on the right contains the text: 'Drag Page bars to a new position' and 'Select Save Menu'.

To add the new Custom Menu to the Theme, select it from the drop down menu in the Primary Navigation Theme Locations section

The screenshot shows the WordPress 'Menus' administration page. At the top, there's a navigation bar with 'New', 'Gallery', and 'WPSQT' buttons, and a user profile 'Howdy, admin'. Below this is a 'Menus' header with a 'Screen Options' and 'Help' dropdown. A yellow notification bar states 'The extra menu menu has been updated.' The main content area is titled 'extra menu' and includes a 'Menu Name' field with 'extra menu' and an 'Automaticall' checkbox. A 'Delete Menu' link is visible. The 'Theme Locations' dropdown menu is open, showing 'Primary Navigation' (checked) and 'extra menu' (selected). Below this are sections for 'Mobile Navigation' and 'Secondary Navigation'. A 'Save' button is circled in red. At the bottom, there's a 'Custom Links' section with 'URL' and 'Label' fields. A 'Save Menu' button is at the bottom right.

The main content area is titled 'Weaver II 1.1.7 Options' and features a tabbed interface with 'Main Options' and 'Menu' tabs highlighted. The 'Main Options' section includes a 'Save Settings' button and a description: 'Options for the Menu Bar (colors, font style, Mobile menu, Search) and the Info Bar (breadcrumbs, page navigation)'. Below this, the 'Menu Bar and Info Bar' section is expanded to show 'Menu Bar' settings, including color and text options for the menu bar and sub-menu drop downs. A red arrow labeled 'Scroll Down' points to the bottom of the page.

Text for Secondary Menu label:

Hide Menu Bars for Mobile:

Hide Secondary Menu Bar for Mobile:

Use Pull Down Menu on Phones:

Use Slide Open Menu for Small Tablets: Pro Version

No Menu Effects on Mobile: Pro Version

Extras

Menu Bar Gradient:

Menu Bar Shadow:

Use Menu Effects:

Arrow color: White Arrows

Add Search to Menu Bar:

Add Log in to Menu Bar:

Move Primary Menu to Top:

Move Top Menu outside #wrapper: Pro Version

Move Top Menu next to header image:

Hide Menu Bars:

No Home Menu Item:

Add HTML to Menu Bar

Add HTML to Left:

Add HTML to Right:

Menu Bar Layout

Menu Bar Height: Pro Version

This lets you change the Menu label on the phone slide open secondary menu bar. (Default: Menu)

Hide Menu Bars on Mobile View - be sure to provide alternative navigation if you hide them.

Hide just the secondary menu on mobile phone view.

Use Pull Down Menu for smart Phone view (same menu as tablets and standard browser). (Default: Slide Open vertical)

Use alternate Slide Open Menu for Small Tablets instead of Small Tablet Pull Down Menu. (Pro)

Don't automatically use Menu Effects on mobile views (Pro)

Menu Bar enhancements and features

Check to add gradient effect to menu bars

Add a slight shadow to the Menu Bar. (Doesn't display on older IE versions.)

Check to use Menu Effects: arrows for sub-menus, shadows, smooth open

Select color for arrow used with Menu Effects

Add a search box to Primary menu bar on right.

Add a simple Log In link to Primary menu bar on right.

Move the Primary Menu to above the image (Secondary Menu will be on bottom)

Move the top menu outside (right before) the #wrapper <div>. (Custom style using #nav-top-menu) (Pro)

Move the top menu next to (right above) the header image/header insert code area/horizontal widget area.

Don't want menu bars? Hide them. (If empty, Primary or Secondary custom menus won't display.)

Don't automatically add Home menu item for home page (as defined in Settings->Reading)

Add HTML to the left or right end of the primary menu bar.

The HTML can include images, links, text, and shortcodes. The maximum height for images is 24px. Add style="top:2px" Wrap text in text for proper centering.

Add HTML to left end of menu bar.

Add HTML to right end of menu bar.

Additional settings for menubar look

Height of Menu Bar. Non-default value won't work well with gradient. (Default: 38px) (Pro)

How to add an image to a page

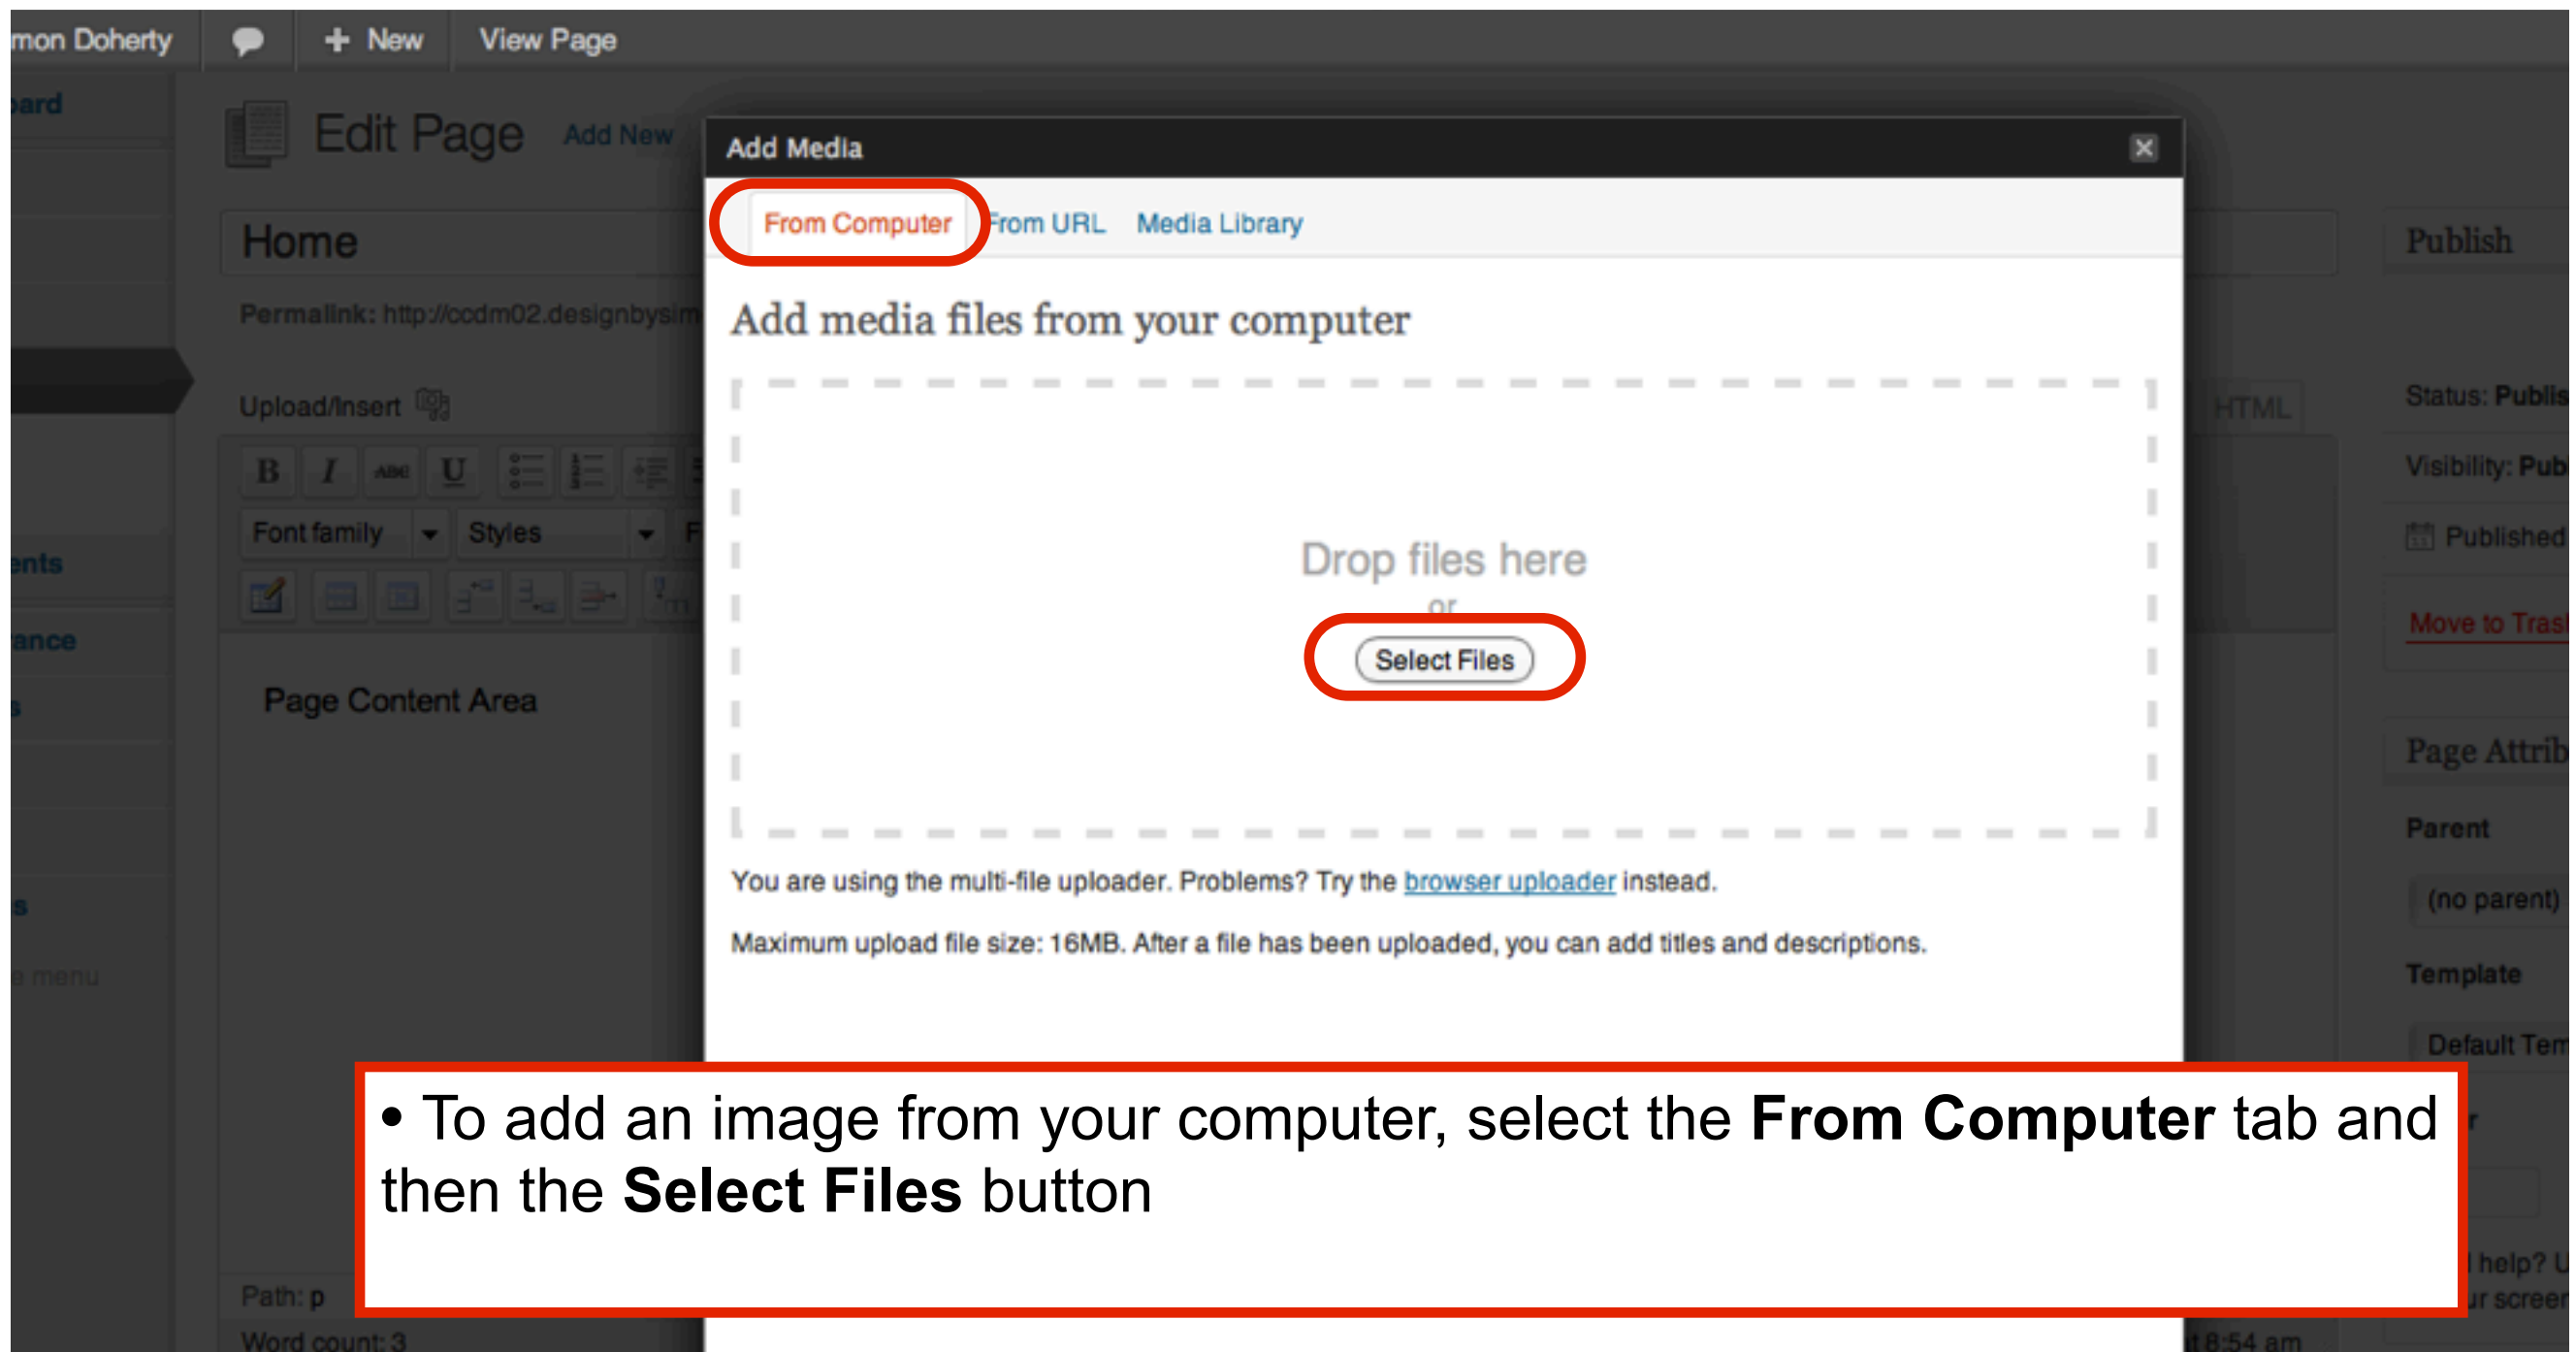

Select Upload/Insert

The screenshot shows the WordPress admin dashboard for a user named Simon Doherty. The left sidebar contains a menu with items: Dashboard, Posts, Media, Links, Pages (highlighted with a red circle), All Pages, Add New, Comments, Appearance, Plugins, Users, Tools, Settings, and Collapse menu. The main content area is titled 'Edit Page' and shows the page title 'Home'. Below the title is a permalink: <http://ccdm02.designbysimon.com/> with a 'View Page' button. The editor toolbar is visible, with the 'Upload/Insert' button (camera icon) highlighted with a red circle. The page content area is currently empty.

- To add an image to a **Page**, select **Pages**, choose a page from the list of pages you want to add the image to
- Click inside the content area of the page, where ever the mouse cursor is, that is where the image will go
- Select the **Upload/Insert** Camera Icon to **Add Media** to the page

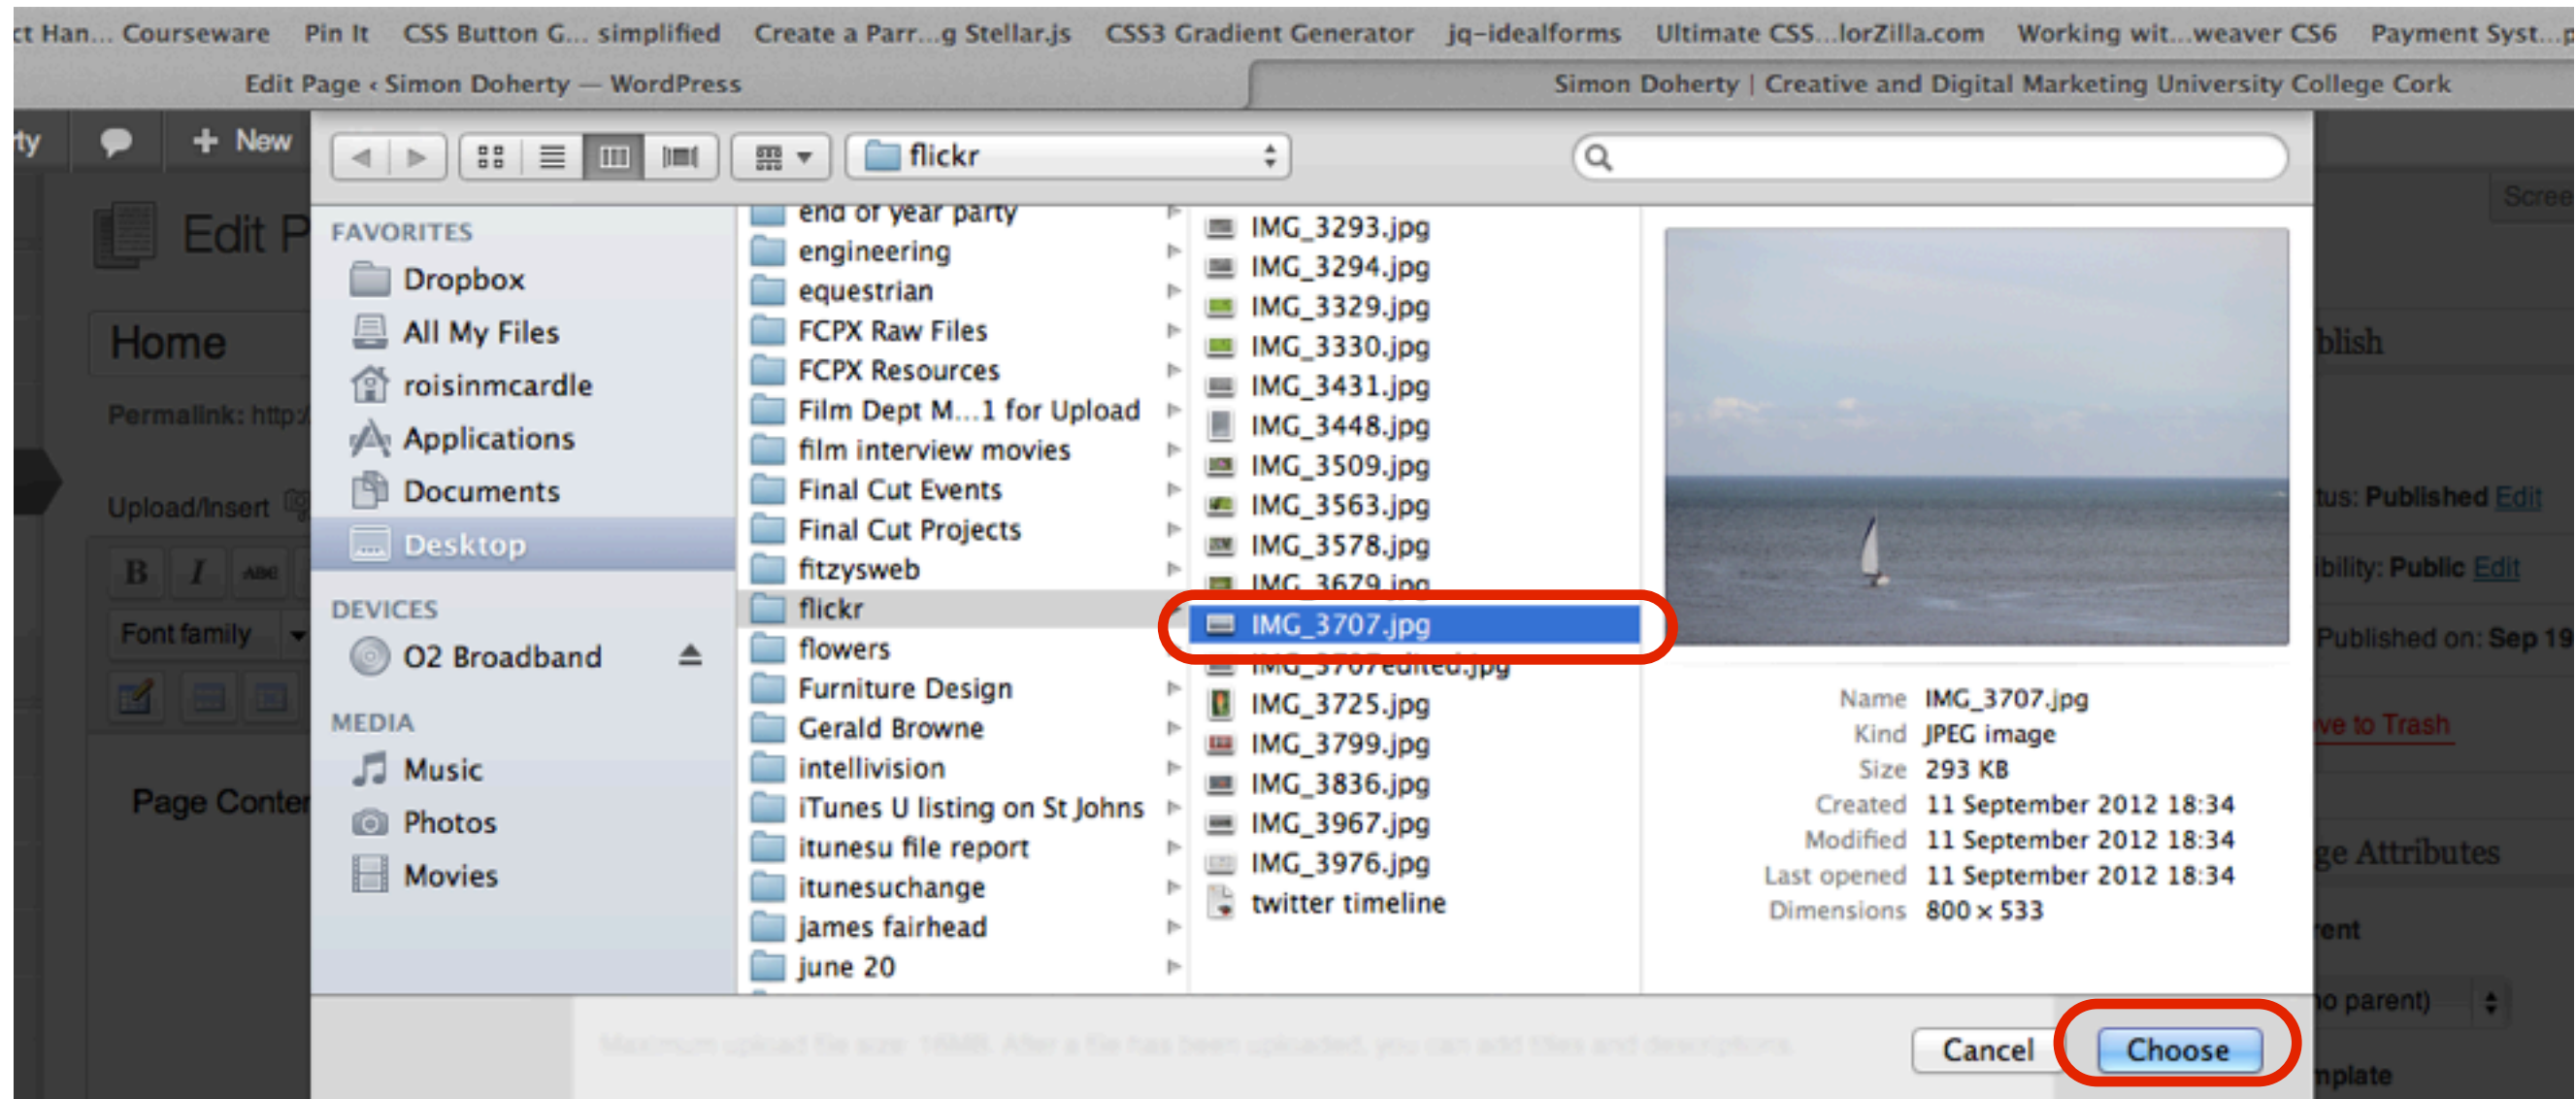

Select Files

The image shows a screenshot of a CMS interface with an 'Add Media' dialog box open. The dialog box has three tabs: 'From Computer', 'From URL', and 'Media Library'. The 'From Computer' tab is selected and highlighted with a red circle. Below the tabs, there is a dashed box containing the text 'Drop files here' and 'or' above a button labeled 'Select Files', which is also highlighted with a red circle. Below the dashed box, there is a note: 'You are using the multi-file uploader. Problems? Try the [browser uploader](#) instead.' and 'Maximum upload file size: 16MB. After a file has been uploaded, you can add titles and descriptions.'

- To add an image from your computer, select the **From Computer** tab and then the **Select Files** button

Choose an image

- Select an image from your computer and select the **Choose** button
