**Summary** DNS Web Mail

A website is a collection of related web pages, images, videos, and other files that are accessible by a common domain name. Here is a list of your websites, from which you can change website hosting settings, open a website directory in file manager, view statistics on website visits, install an SSL certificate, view web server logs, and change DNS zone settings.

**NOTE:** Changing or removing the hosting for a domain may not remove your website files, but it will remove any applications installed through the Application Vault on our shared plans

This does **not** apply to domains hosted on Plesk VPS packages.

### Website Tools

- File Manager**  
Manage files and directories.
- FTP Access**  
In this section you can manage the FTP access by changing password to a new one.

# Wordpress will be installed to the selected domain name

The screenshot shows the Blacknight Solutions control panel interface. At the top, there is a navigation menu with links for Home, Websites, E-mail, Special Offers, Help & Support, and Account. Below the navigation, the breadcrumb trail reads: Parallels Panel > Websites > creativeanddigitalmarketing.designbysimon.com >. The main heading is "Web Applications". A green notification bar at the top of the content area states: "Done Application has been successfully scheduled for installation." Below this is an "Install" button. A table lists the installed applications. The table has columns for ID, Application, URL Path, Version, Upgrade Available, Status, Last Operation, and Entry Point. The first row shows an application with ID 51667, Application "WordPress", URL Path "/", Version "3.5.1-4", Upgrade Available "No", and Status "Installing". The "WordPress" application name and the "Installing" status are circled in red. At the bottom of the table, it says "1 total" and "Items per page 25 50 100".

• In the **Web Applications Section** of the selected **Domain Name**, you can see **Wordpress** has been added as an installed application

• **Logout** of your **Blacknight Account**

ID	Application ^	URL Path	Version	Upgrade Available	Status	Last Operation	Entry Point
51667	WordPress	/	3.5.1-4	No	Installing		

# Enter the Domain Name you installed Wordpress to and view the default Wordpress theme
