

How to Create, Edit and Publish a Video with Voice Narration using Windows Live Movie Maker 2012

Presented by Simon Doherty, Creative and Digital Marketing Springboard Course, UCC

26/02/2013

Introduction

- This lesson demonstrates how to create a movie with photos and voice narration on a PC and publish it on YouTube.
- You will be able to create a video of anything on your computer screen, add a voice-over, text and images of your work, portfolio or client project to demonstrate or market your skills and knowledge to an online audience.

Training Outline

- Lesson 1: Insert photos and add a Voice narration and Music soundtrack with Windows Live Movie Maker 2012

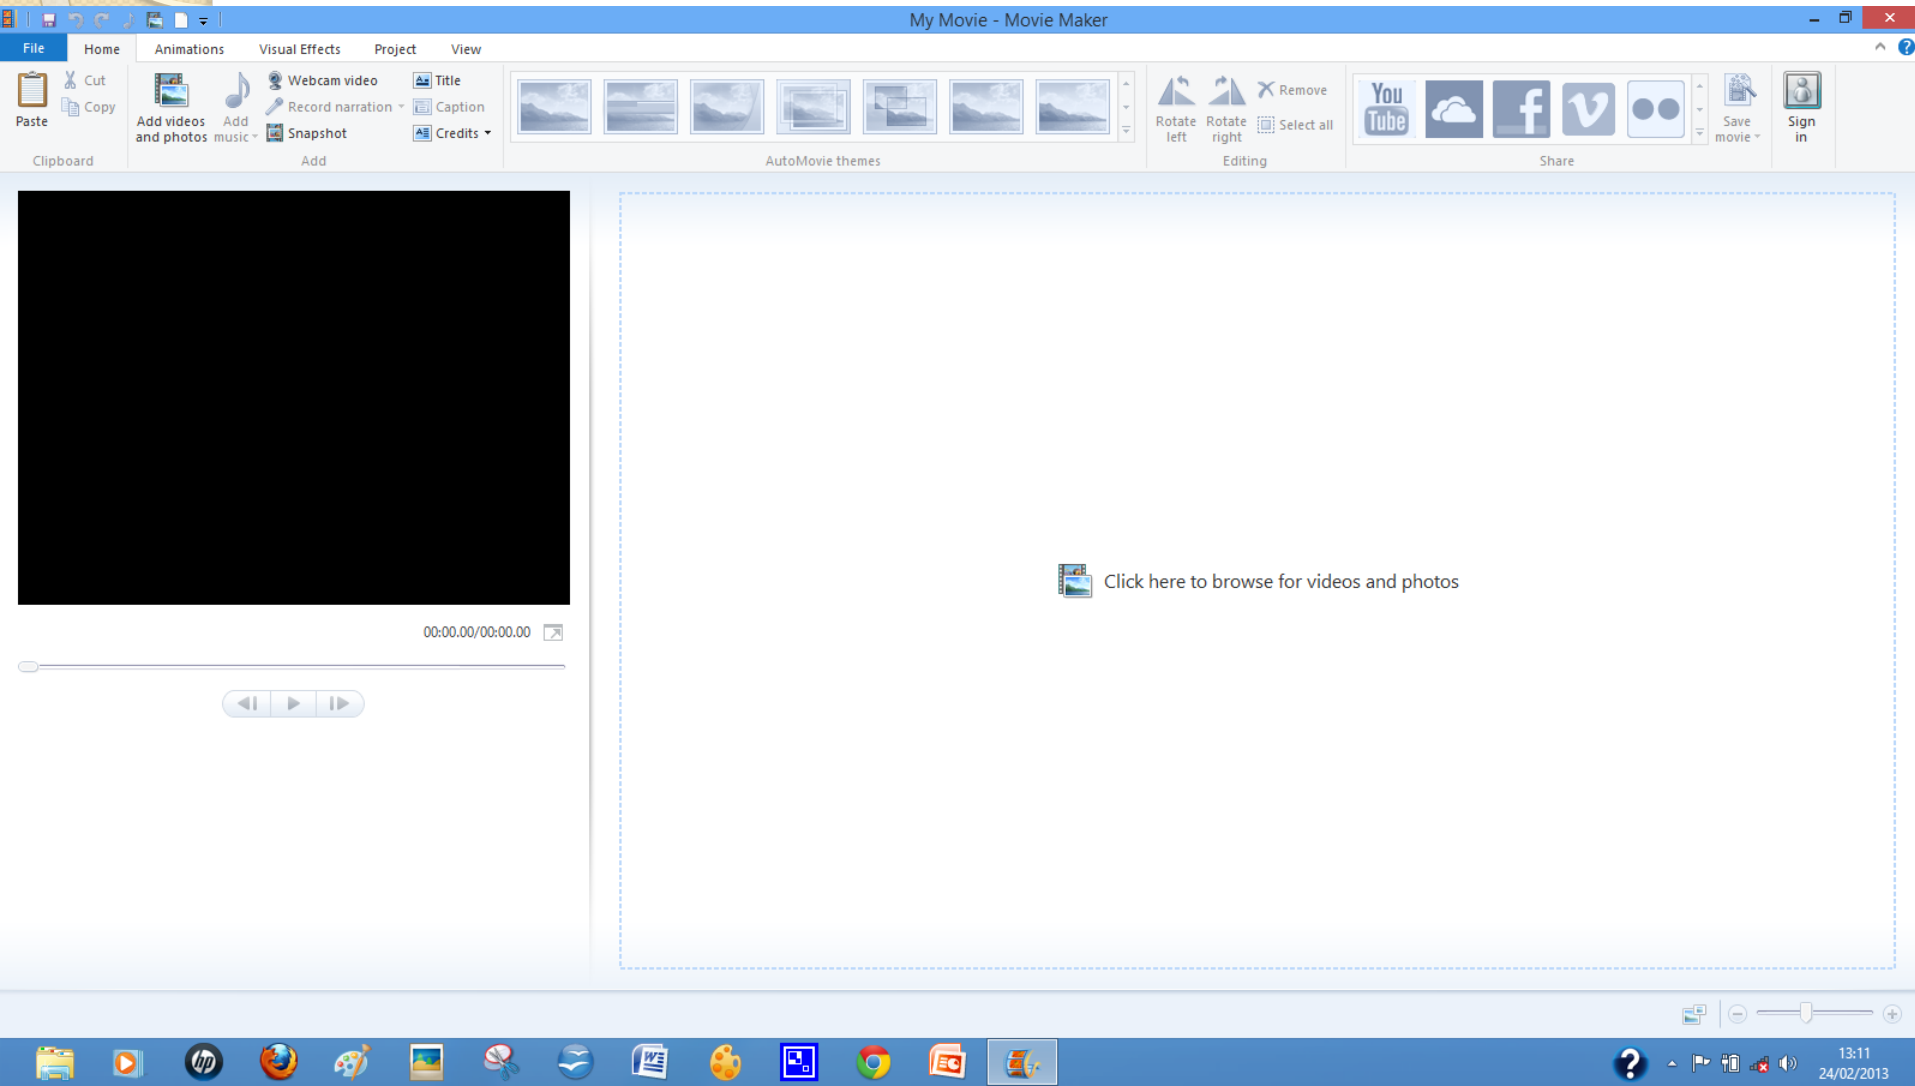

- Lesson 2: Publish the Screen Recording to YouTube

Lesson 1: Windows Live Movie Maker

- Visit Windows Live and download the latest version of Movie Maker 2012
- Add your photos to the editing window
- **NEW * Record Voice narration ***
- **NEW * Add a music track from the Free Music Archive ***
- Set the start and end points
- Add titles, captions and credits
- Insert transitions
- Save your movie project

Lesson 1: Launch Windows Live Movie Maker 2012

New Feature added to the Home toolbar tab: Record narration

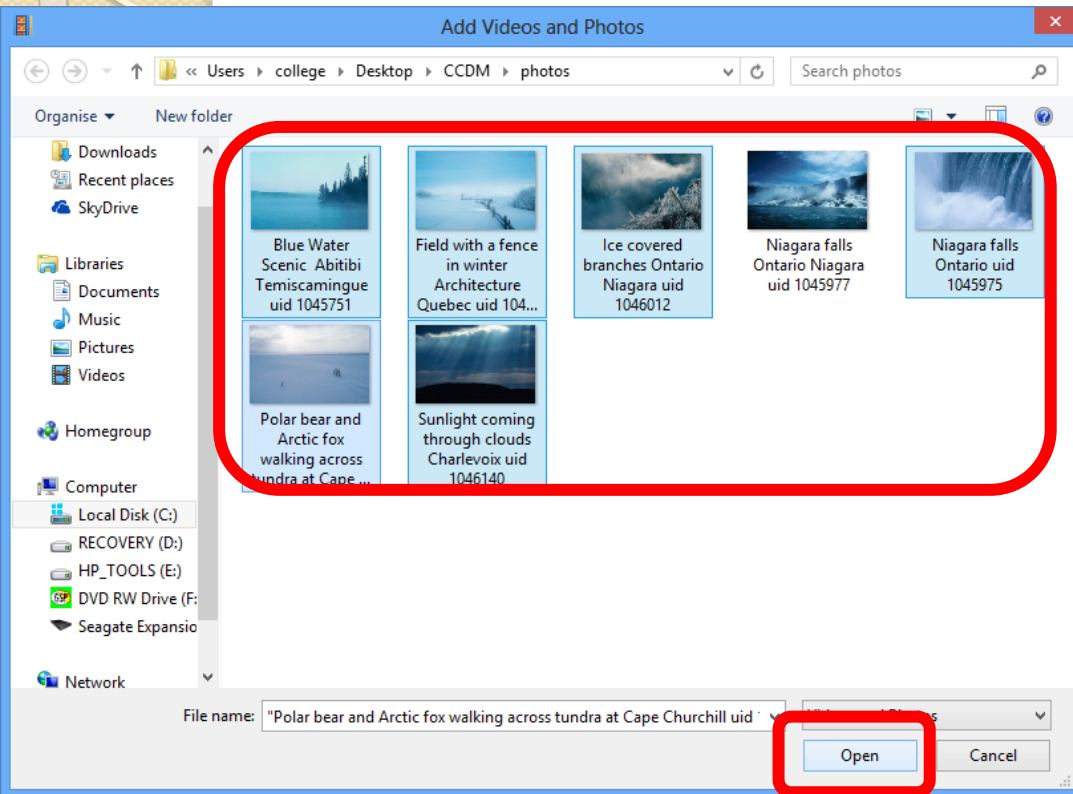

Select Click here to browse for videos and photos

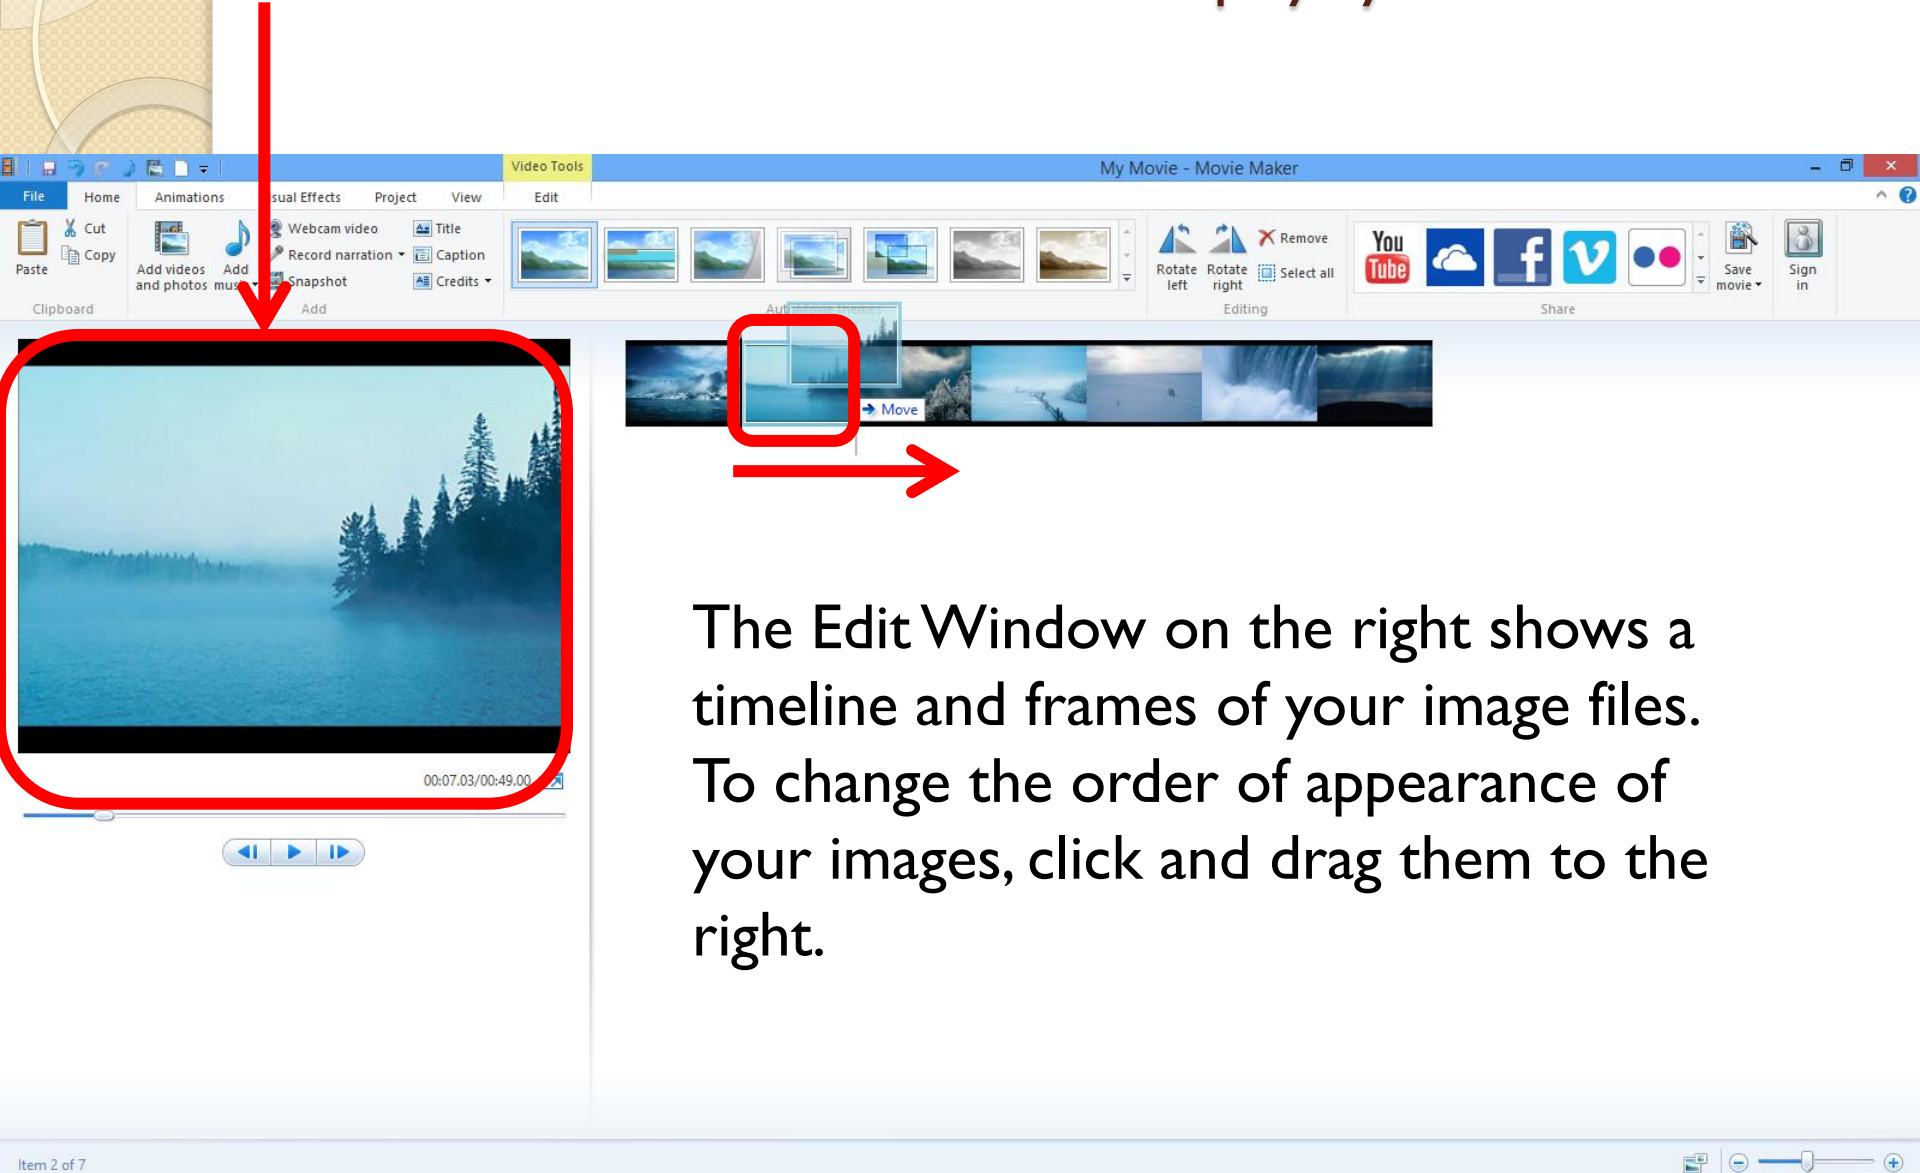

Click here to browse for videos and photos

Select your images and click Open

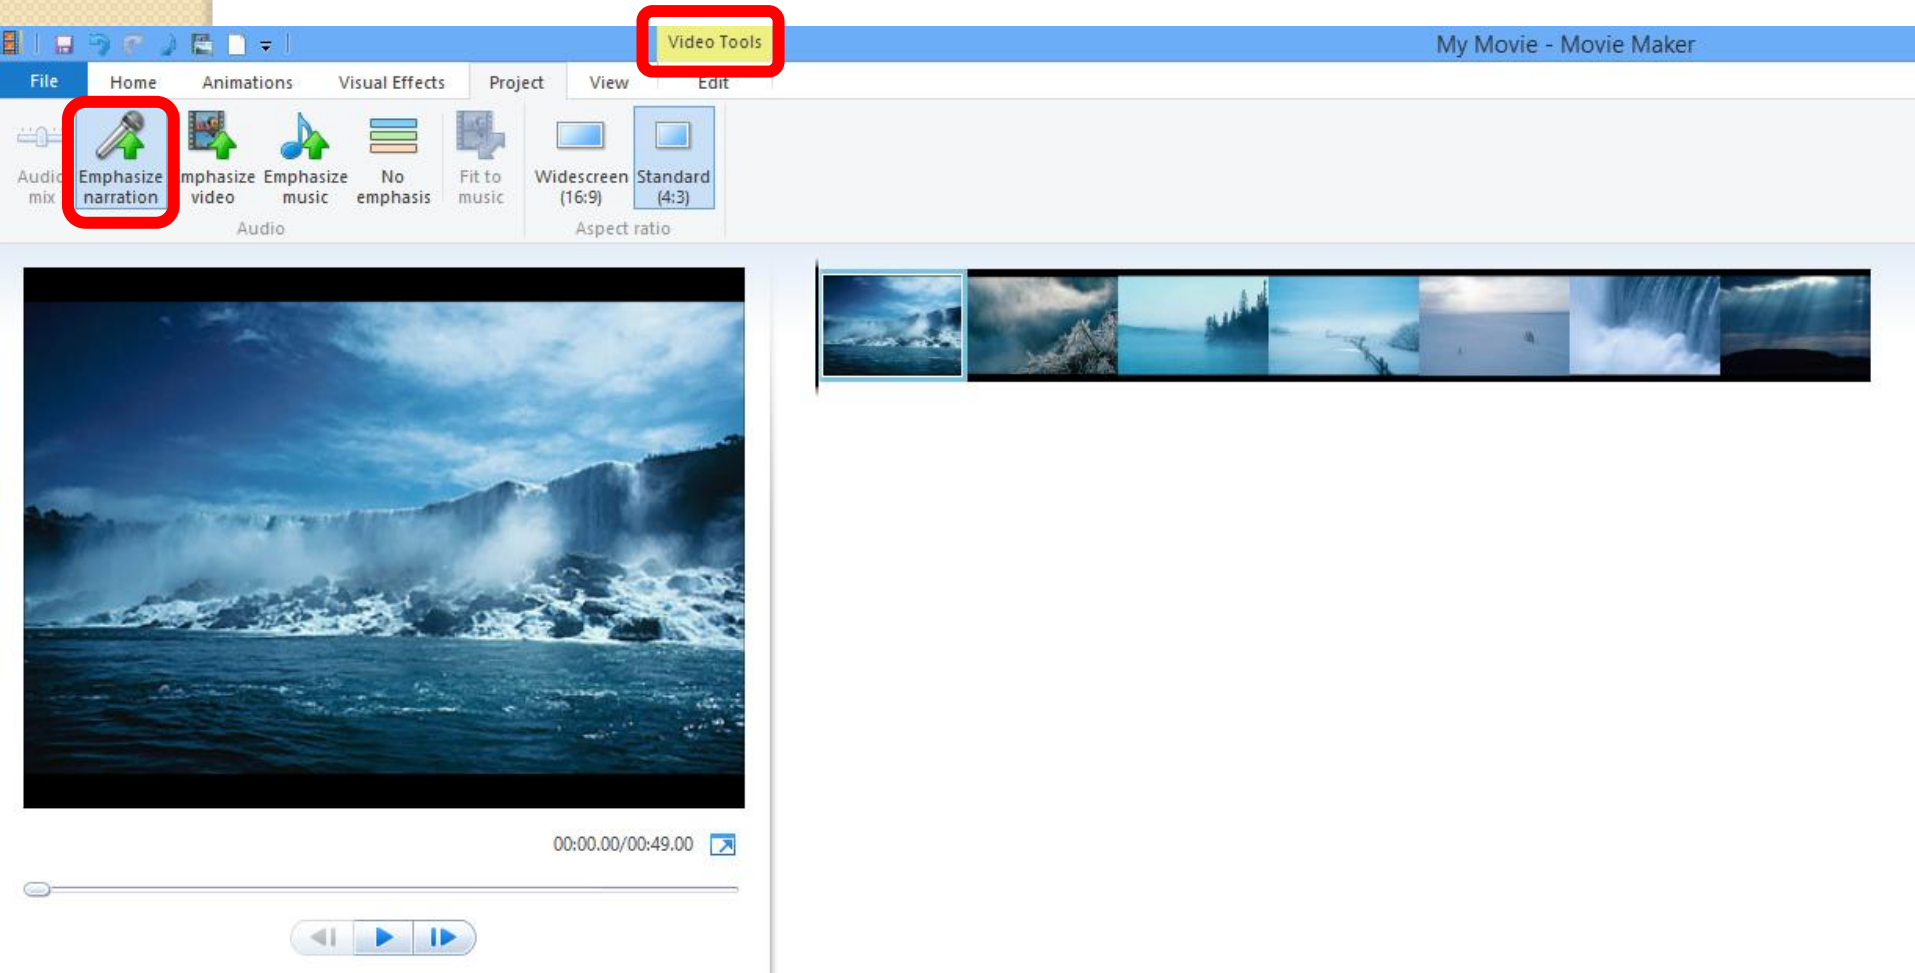

The Preview Window on the left displays your movie.

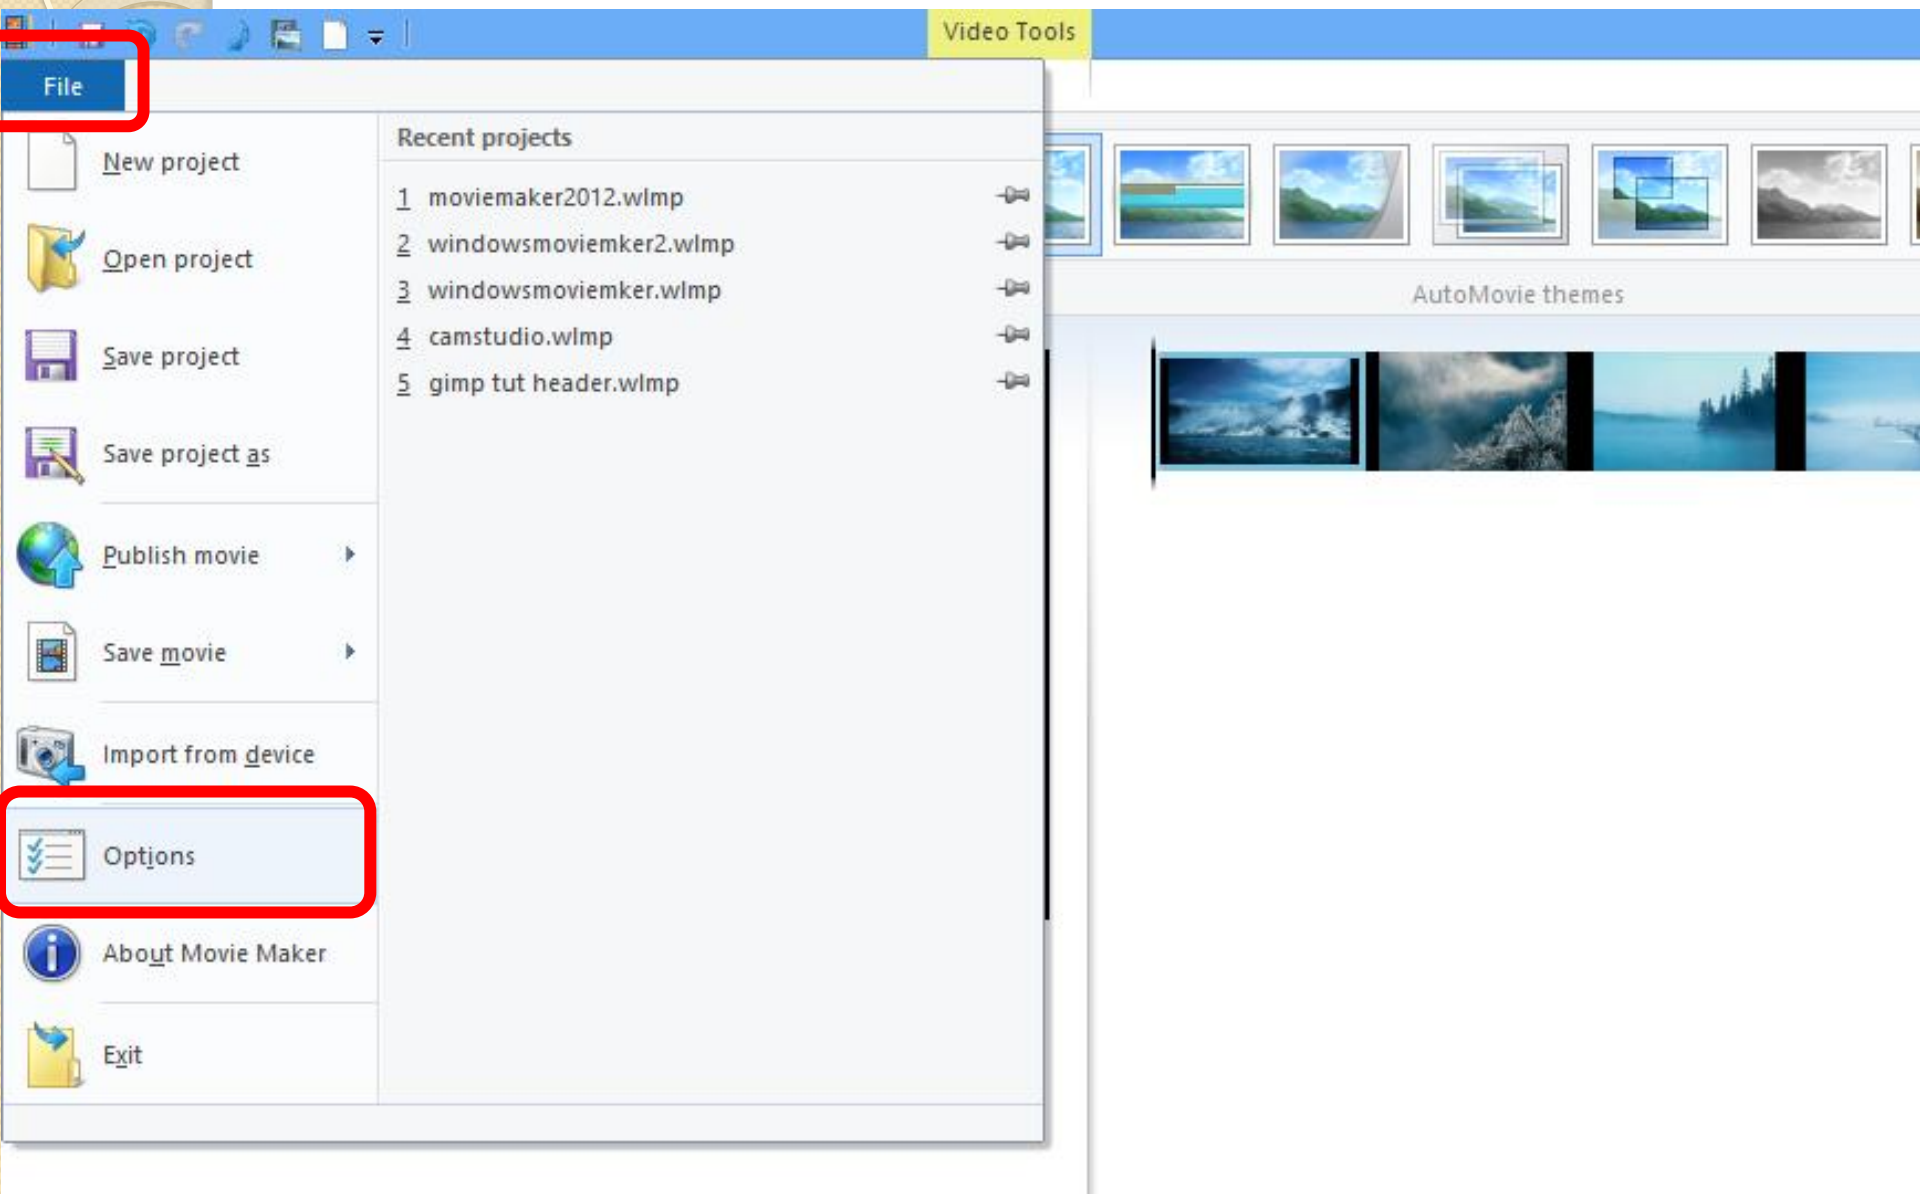

The Edit Window on the right shows a timeline and frames of your image files. To change the order of appearance of your images, click and drag them to the right.

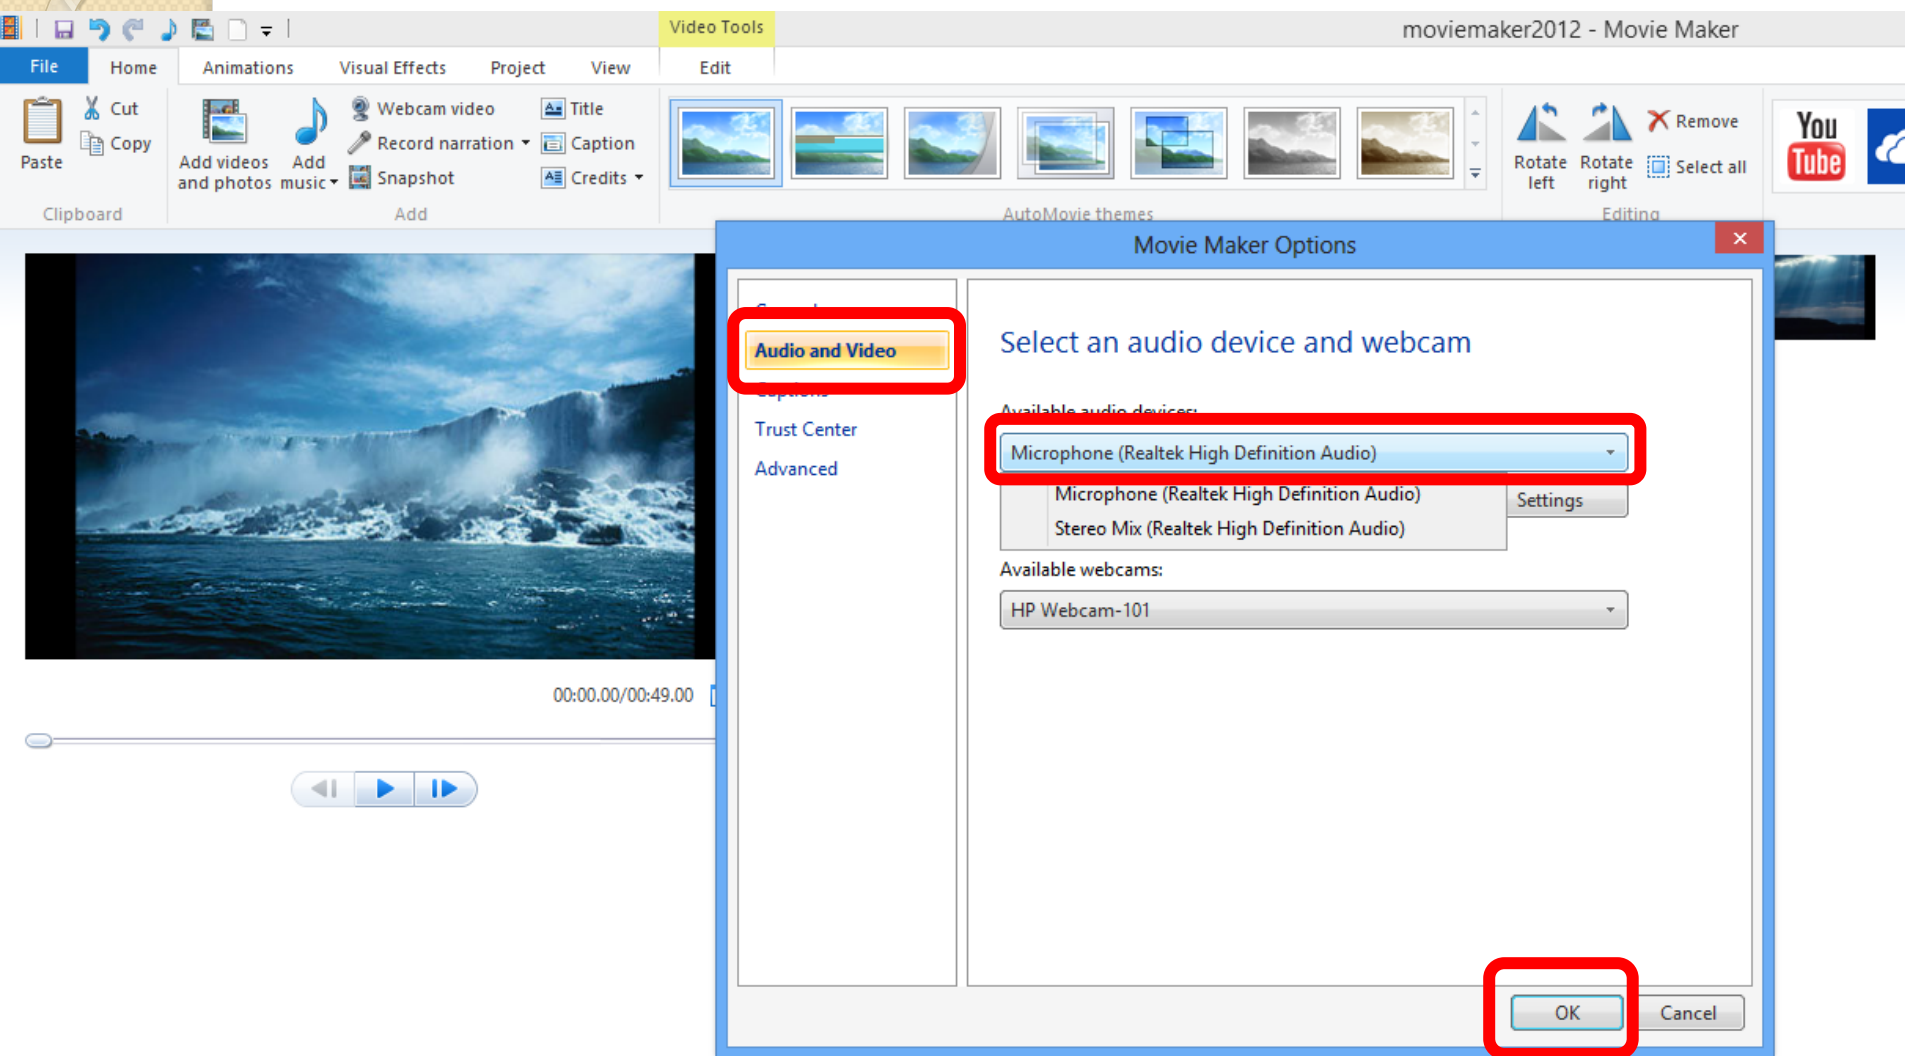

For Voice Narration, select Video Tools – Enhance narration, this sets the volume of the narration to the primary sound, with music and video volume lowered.

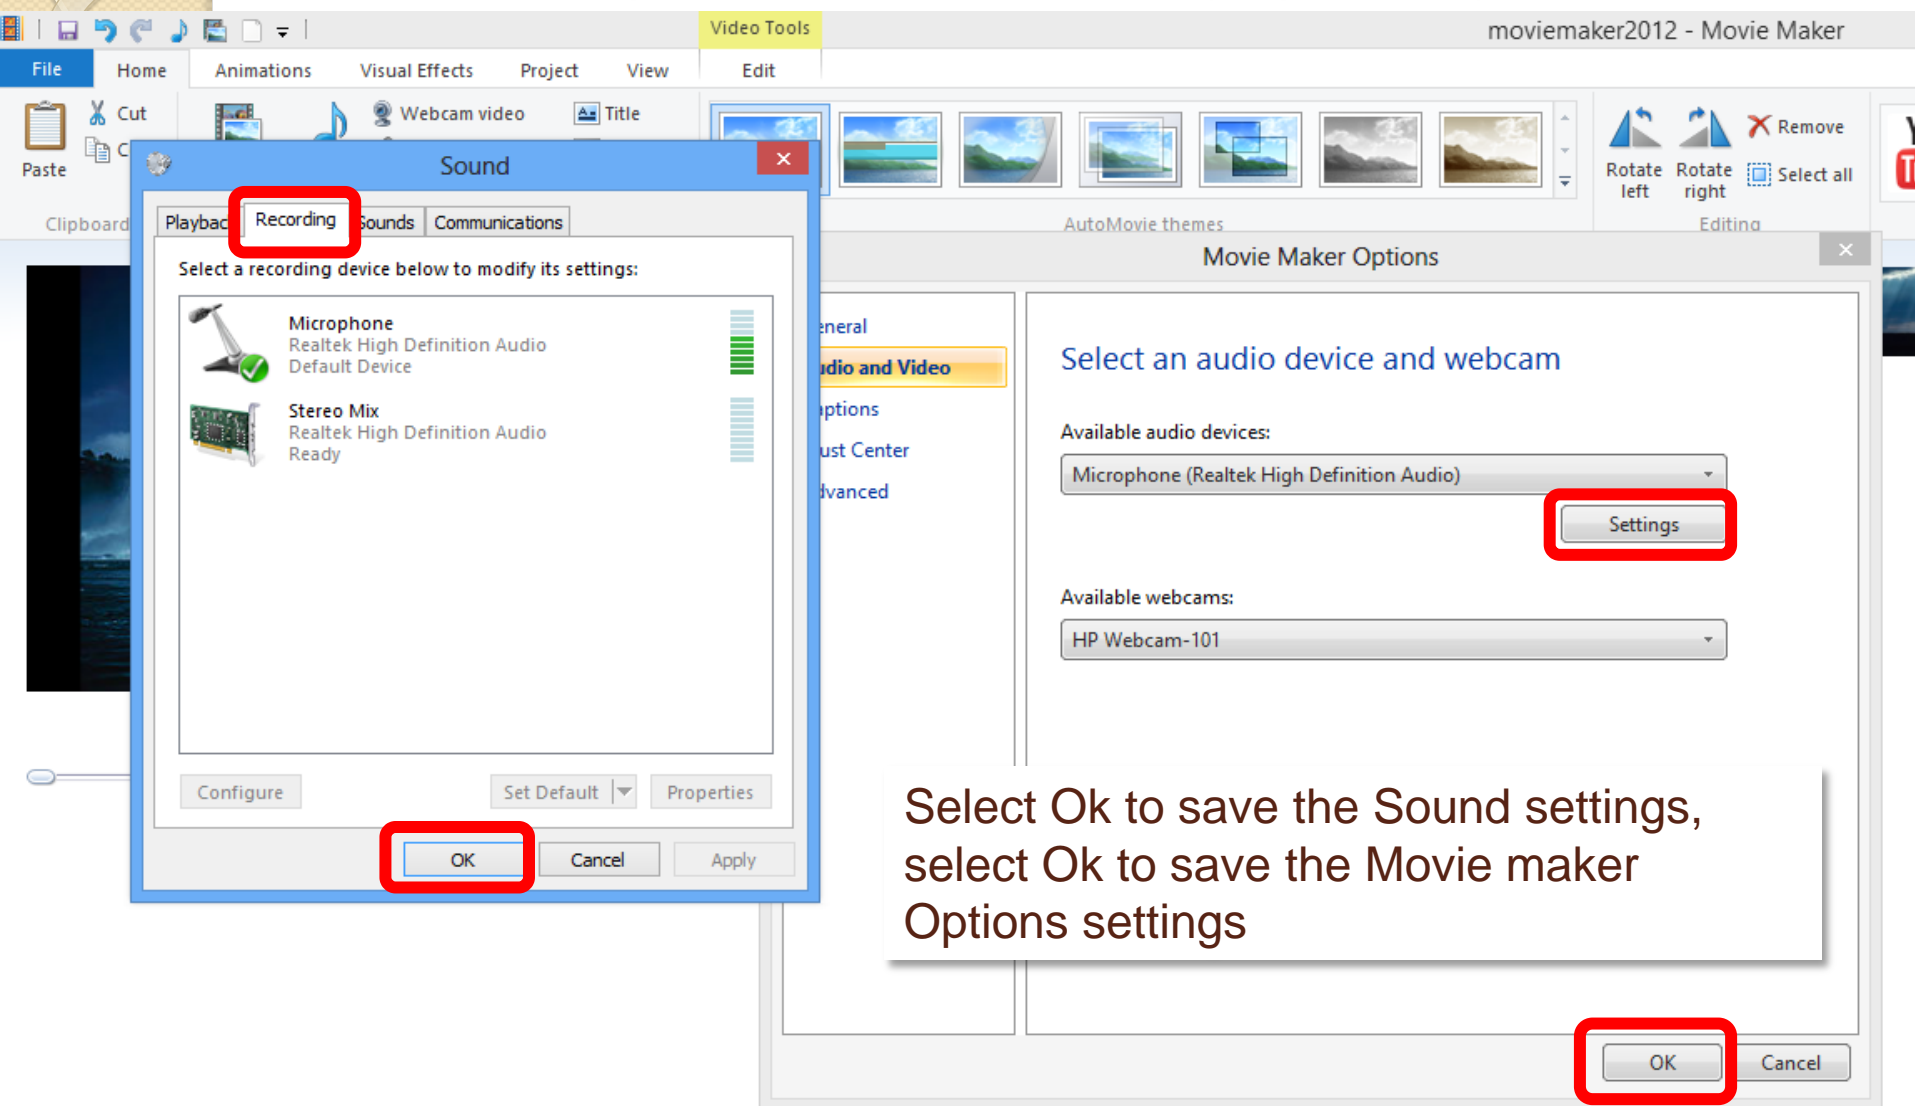

Before you begin you Voice narration, connect a microphone to your PC and select File - Options

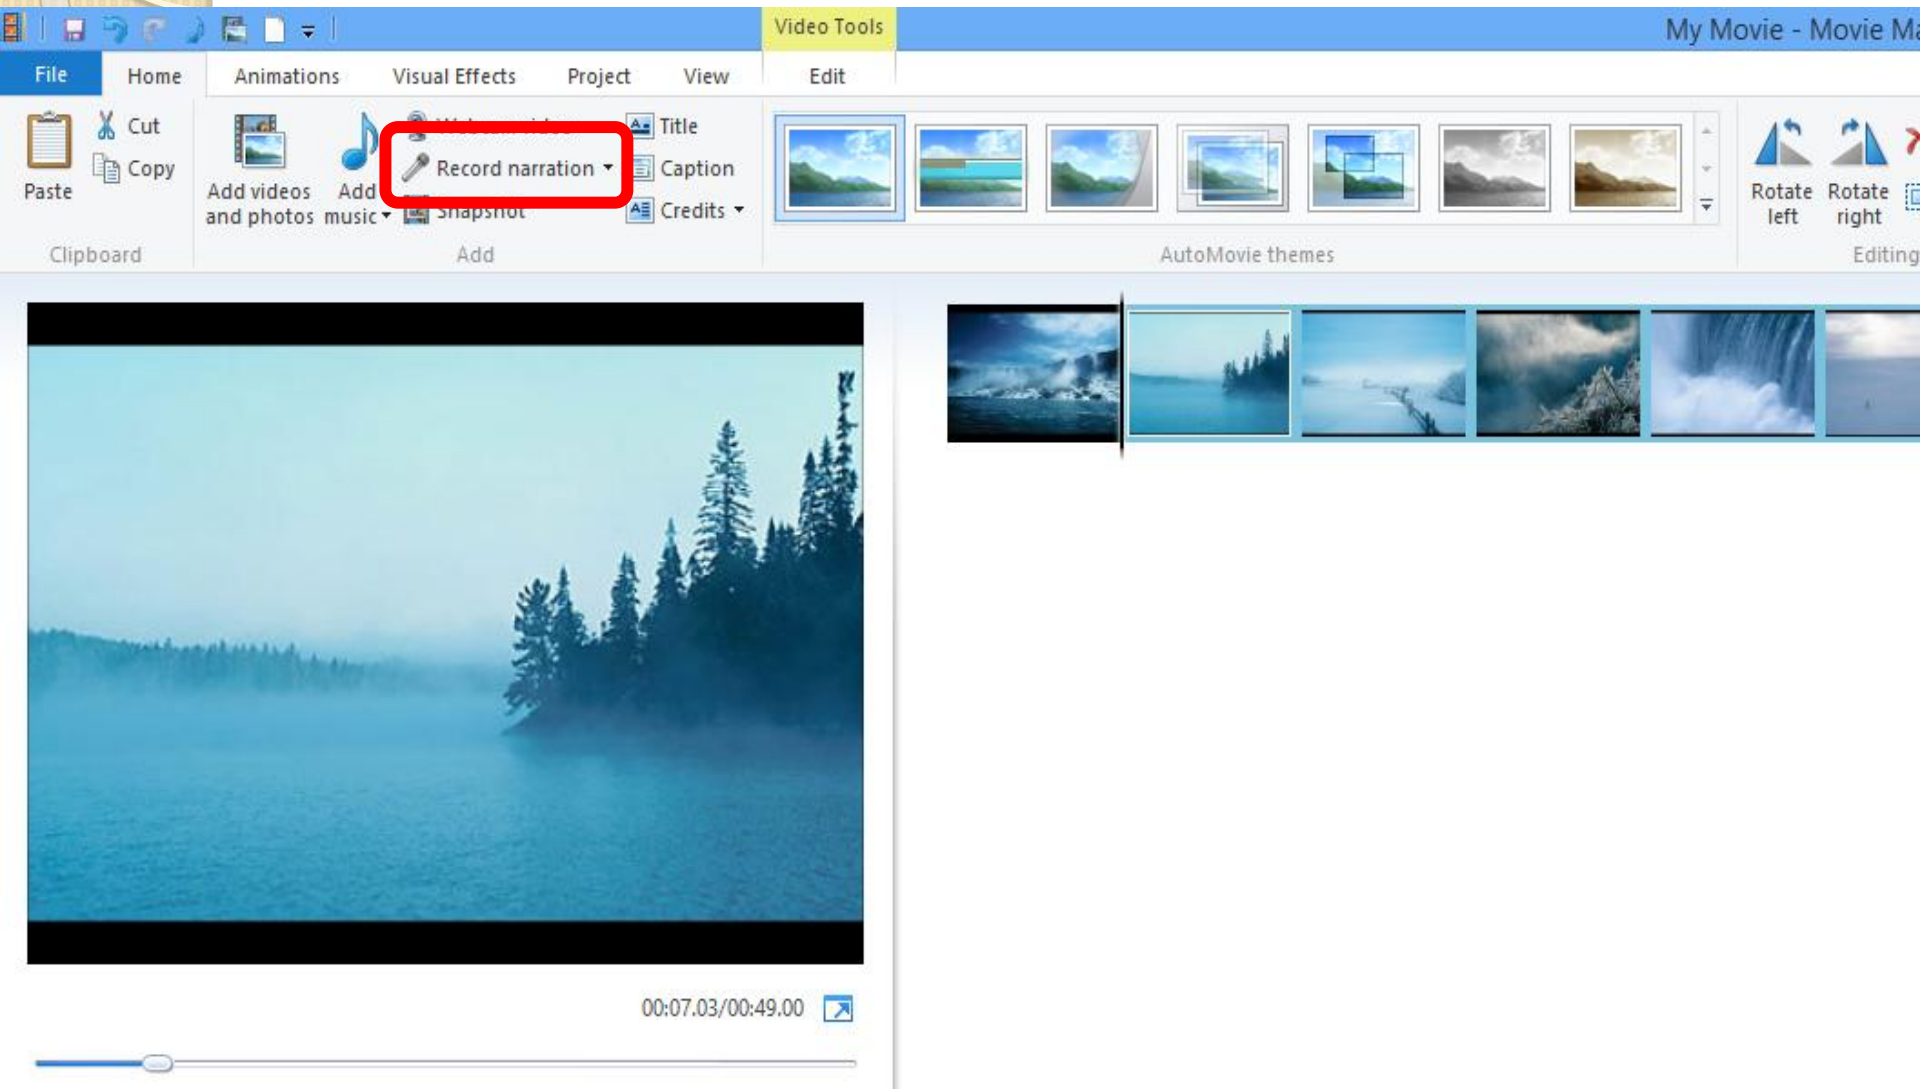

In the Movie Maker Options window, select Audio and Video, choose your microphone from the drop down menu Available audio devices and select Ok

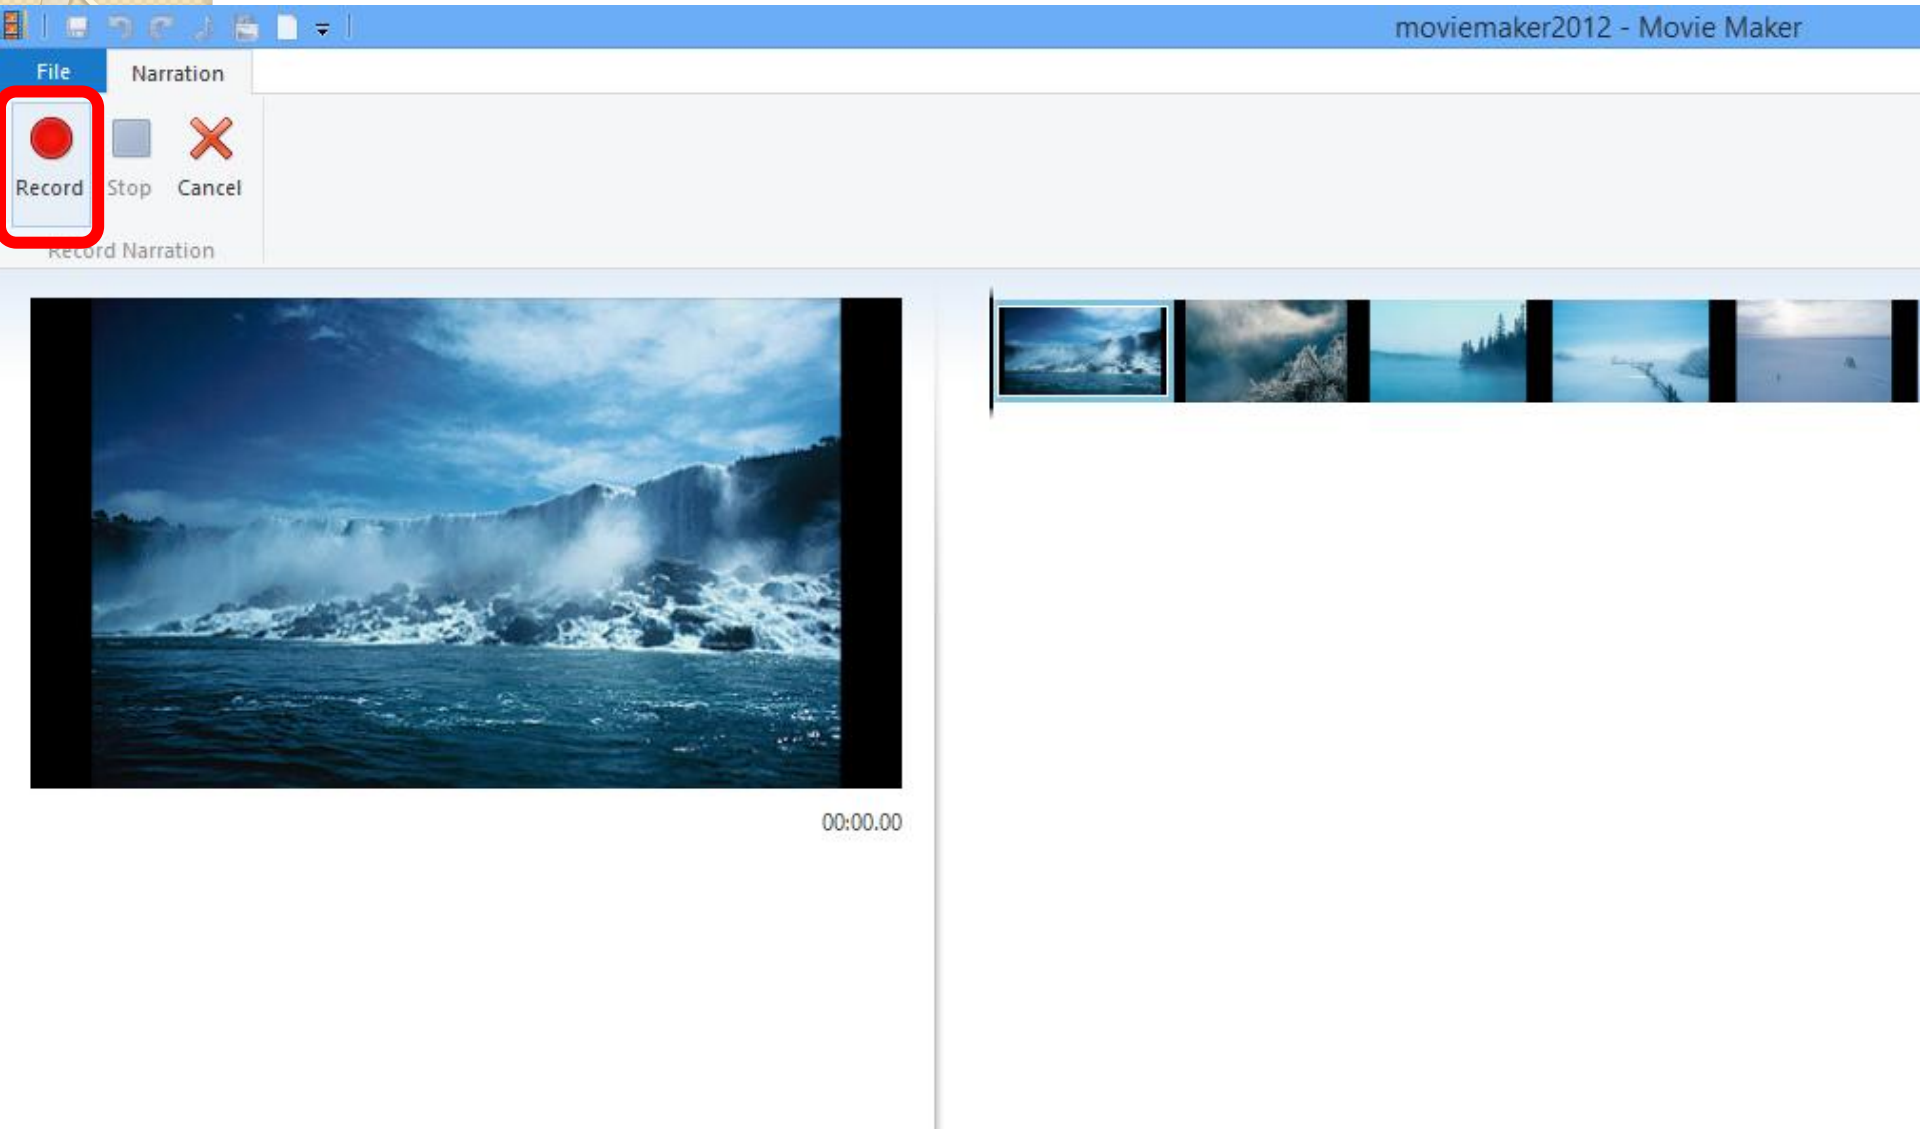

Test your microphone by selecting Settings in the Movie Maker Options window, select Recording. Speak into your mic and adjust your PC's volume, displayed as green bars.

Select Record narration to open the Narration Controls window

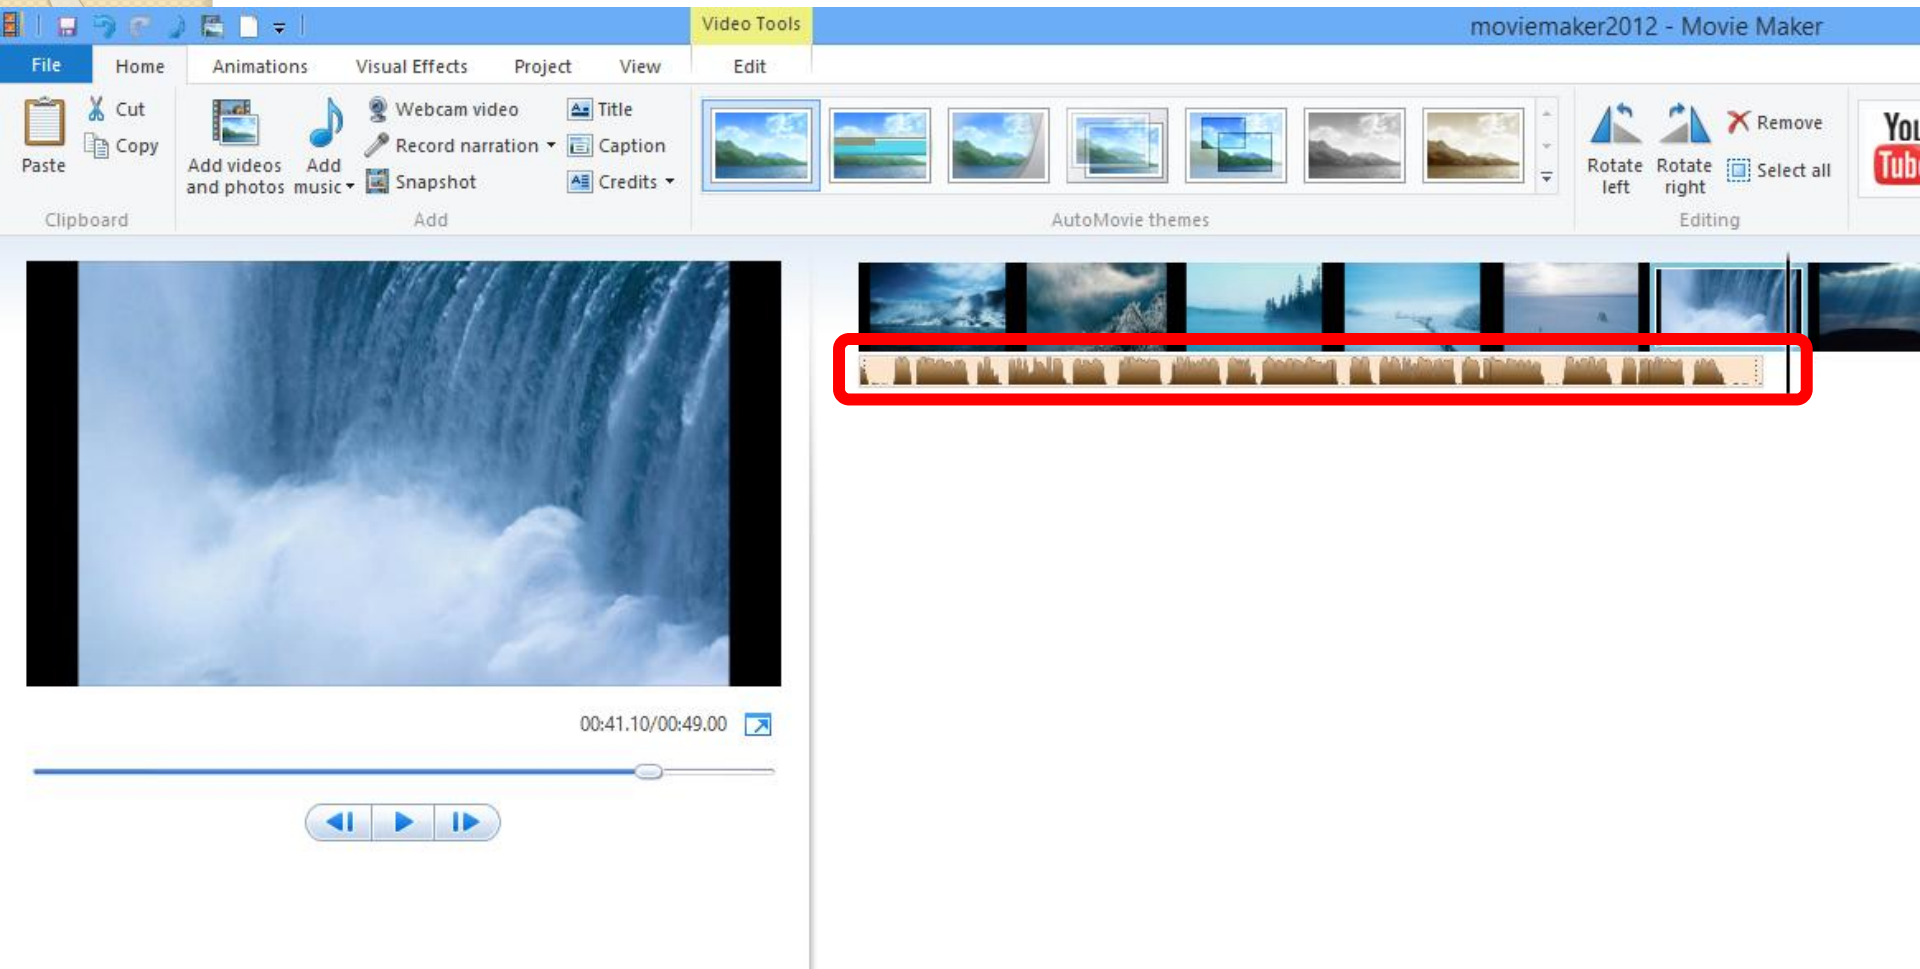

Select Record in the Narration Controls window to record your Voice Narration, select Stop to end the recording

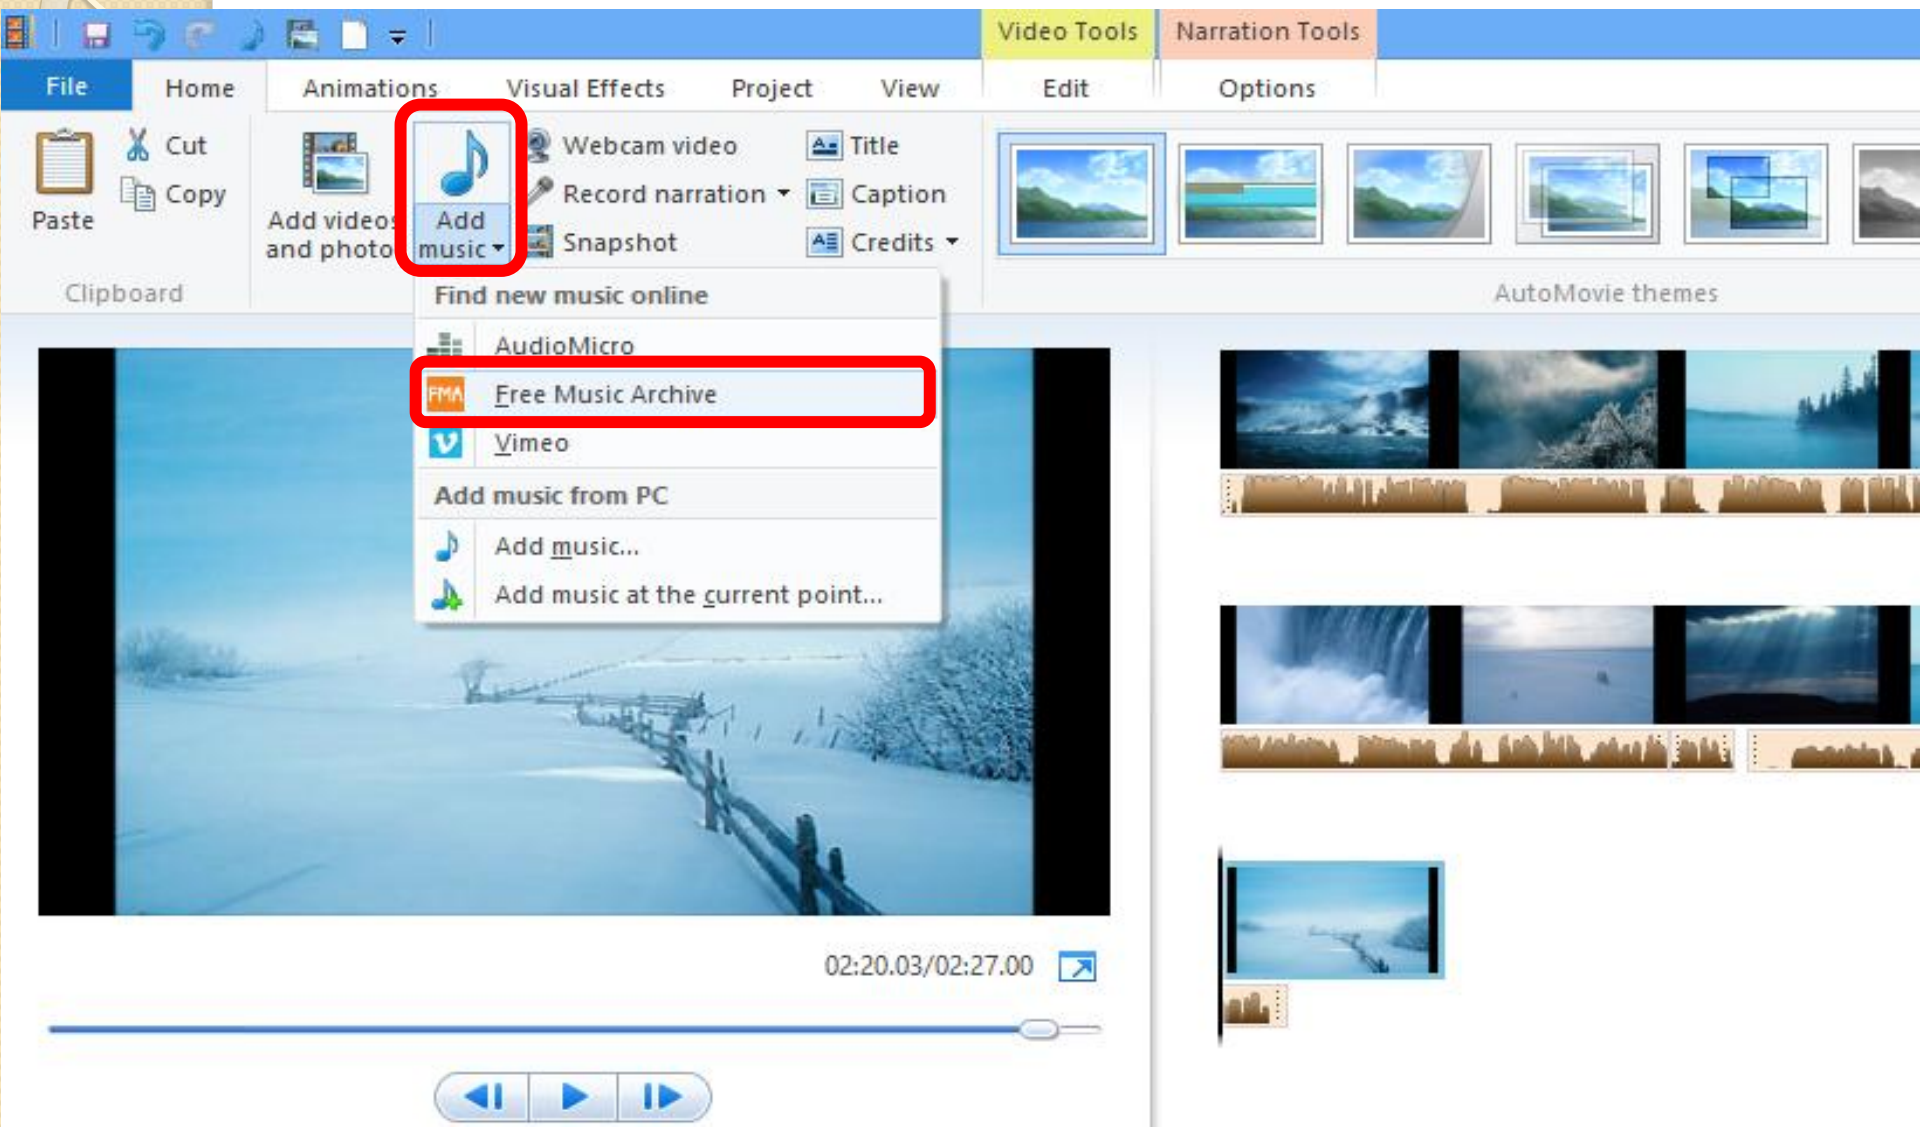

After you select Stop to end the recording, the Save Narration window opens, prompting you to save your Voice narration as a Windows Media Audio File. Enter a name and select Save

The Voice narration appears in the Timeline Editing window, as a brown audio wave track below the images.

To add a music track to your movie, select Add music – Free Music Archive. Windows Live has a link to a free, online music library of soundtracks for your videos

Visit <http://freemusicarchive.org> to browse for the music you want to add to your video. Select the Down Arrow to download the selected track to your PC and save it in a folder.

	Lee Maddeford	"Tom's Lullaby (with Les Gauchers C	"Instrumentals 1"	CLASSICAL, EASY LISTENING: INS	

Download

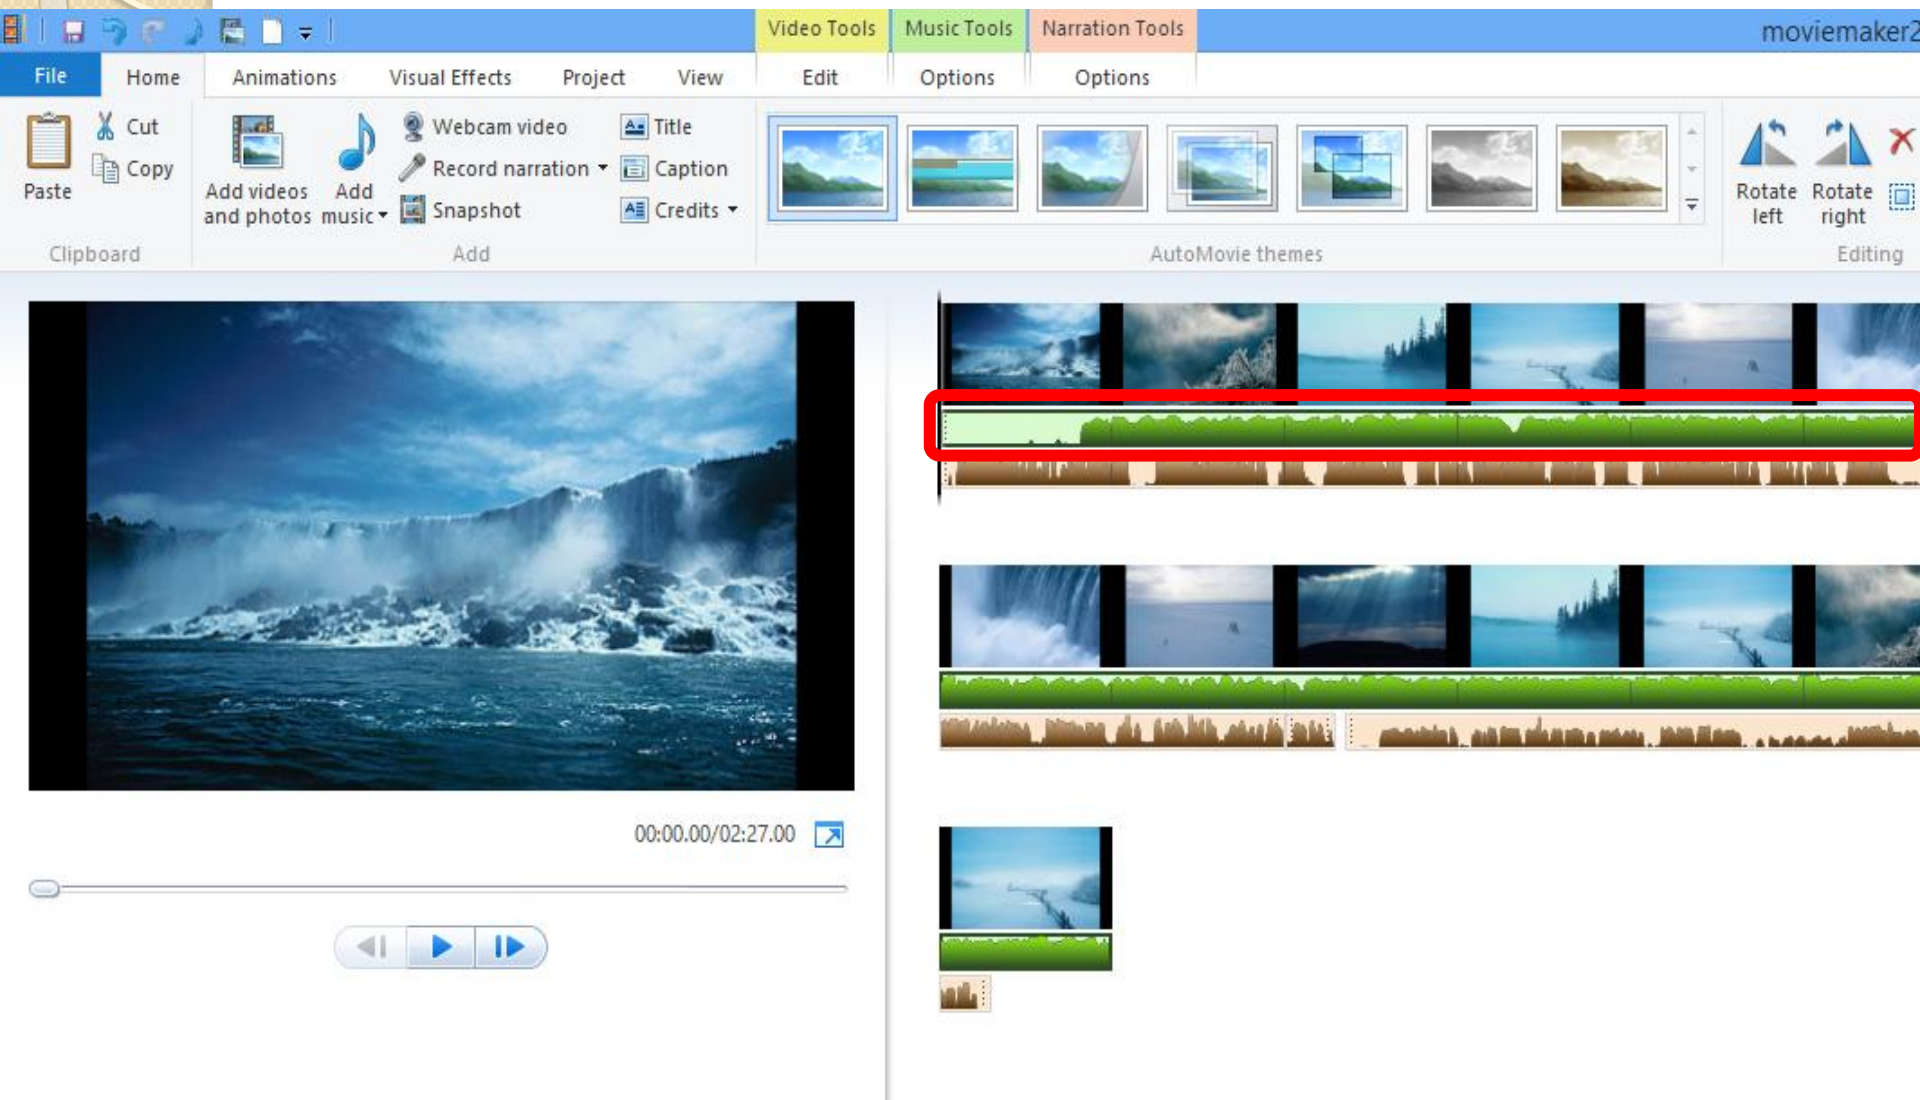

To add the FMA music track to your movie, select Add music – Add music. Navigate to the folder where you saved the downloaded music file.

Select the downloaded music file and select Open.

The Music file is added to the Timeline Editing window, appearing as a green audio wave track, above the brown Voice narration track.

Select Music Tools to add Fade in and out effects, start time and end points and split actions to the Music track.

The screenshot displays a video editing software interface. The top menu bar includes 'File', 'Home', 'Animations', 'Visual Effects', 'Project', 'View', 'Edit', 'Video Tools', 'Music Tools', and 'Narration Tools'. The 'Music Tools' tab is selected and highlighted with a red box. Below this tab, the 'Options' panel is visible, also highlighted with a red box. It contains the following controls:

- Music volume:** A speaker icon and a volume slider.
- Fade in:** A dropdown menu set to 'Slow'.
- Fade out:** A dropdown menu set to 'None'. A sub-menu is open, showing options: 'None', 'Slow', 'Medium', and 'Fast'.
- Split:** A button with a vertical line icon.
- Set start time:** A clock icon and a text field showing 'Start time: 0.00s'.
- Set start point:** A playhead icon and a text field showing 'Start point: 5.17s'.
- Set end point:** A playhead icon and a text field showing 'End point: 167.89s'.

The main preview window shows a video of a large waterfall. Below the preview window is a timeline with a playhead at 00:00.00/02:27.00. The timeline includes a video track and an audio track. The audio track shows a green waveform and a brown waveform. The video track shows a sequence of video clips. The audio track is also highlighted with a red box.

Select Music Tools – Music volume to decrease the Music volume so you can hear the Voice narration clearly

The screenshot displays a video editing software interface. The top ribbon includes tabs for File, Home, Animations, Visual Effects, Project, View, Edit, Video Tools, Music Tools (highlighted with a red box), and Narration Tools. The Music Tools tab is active, showing options for Fade in, Fade out, and a Music volume slider (also highlighted with a red box). The main preview window shows a video of a waterfall. The timeline at the bottom displays video and audio tracks.

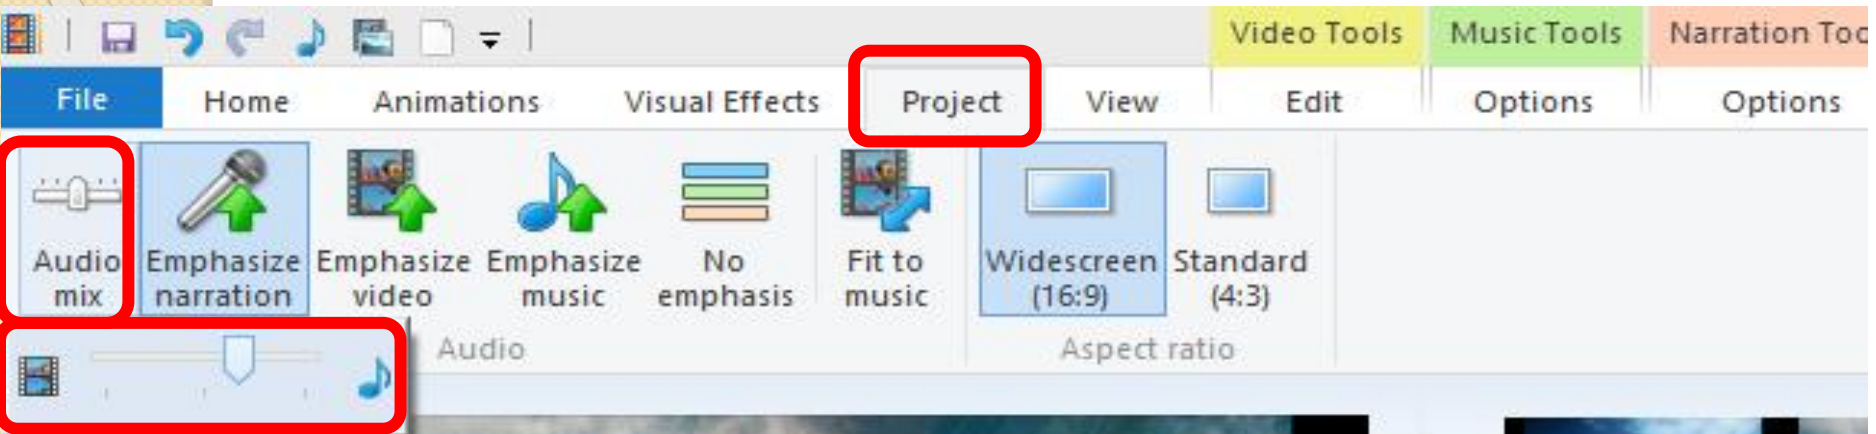

Music Tools Tab Options:

Option	Value
Set start time	Start time: 0.00s
Set start point	Start point: 5.17s
Set end point	End point: 167.89s

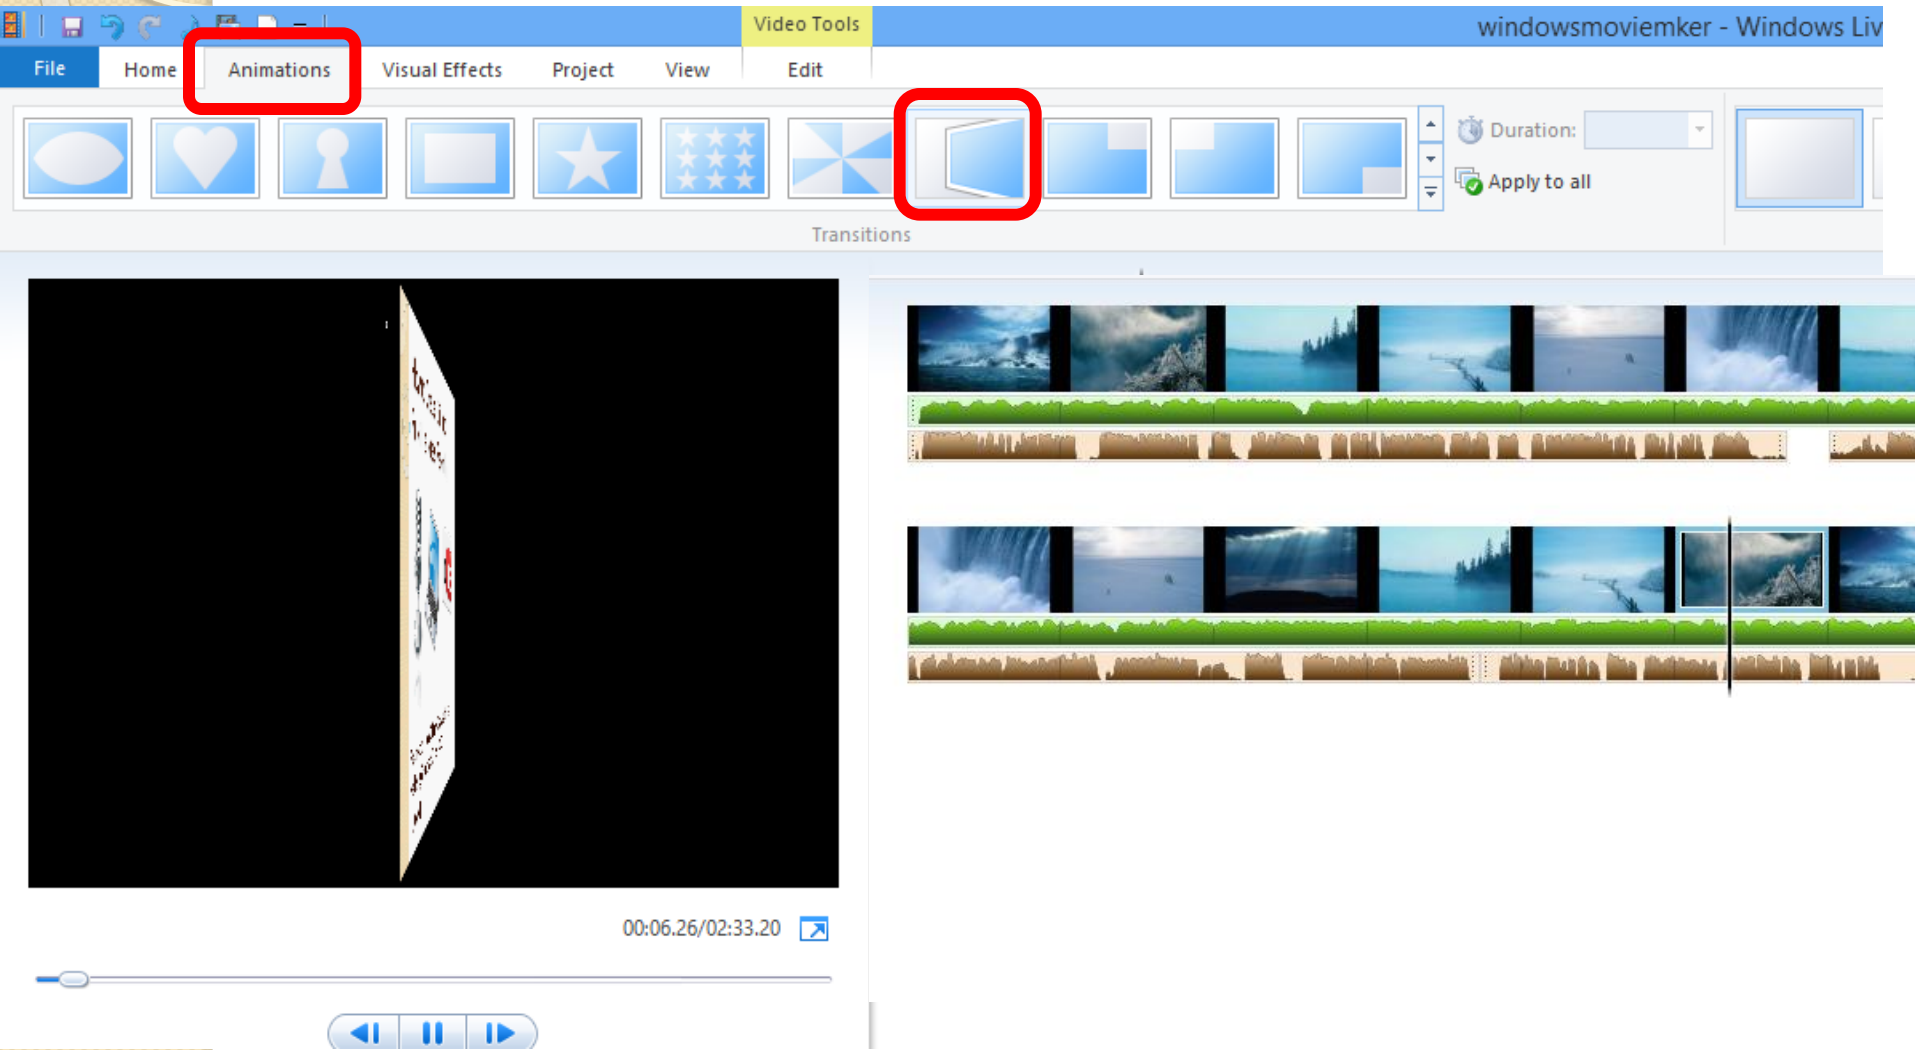

Music volume control:

Music volume: [Slider]

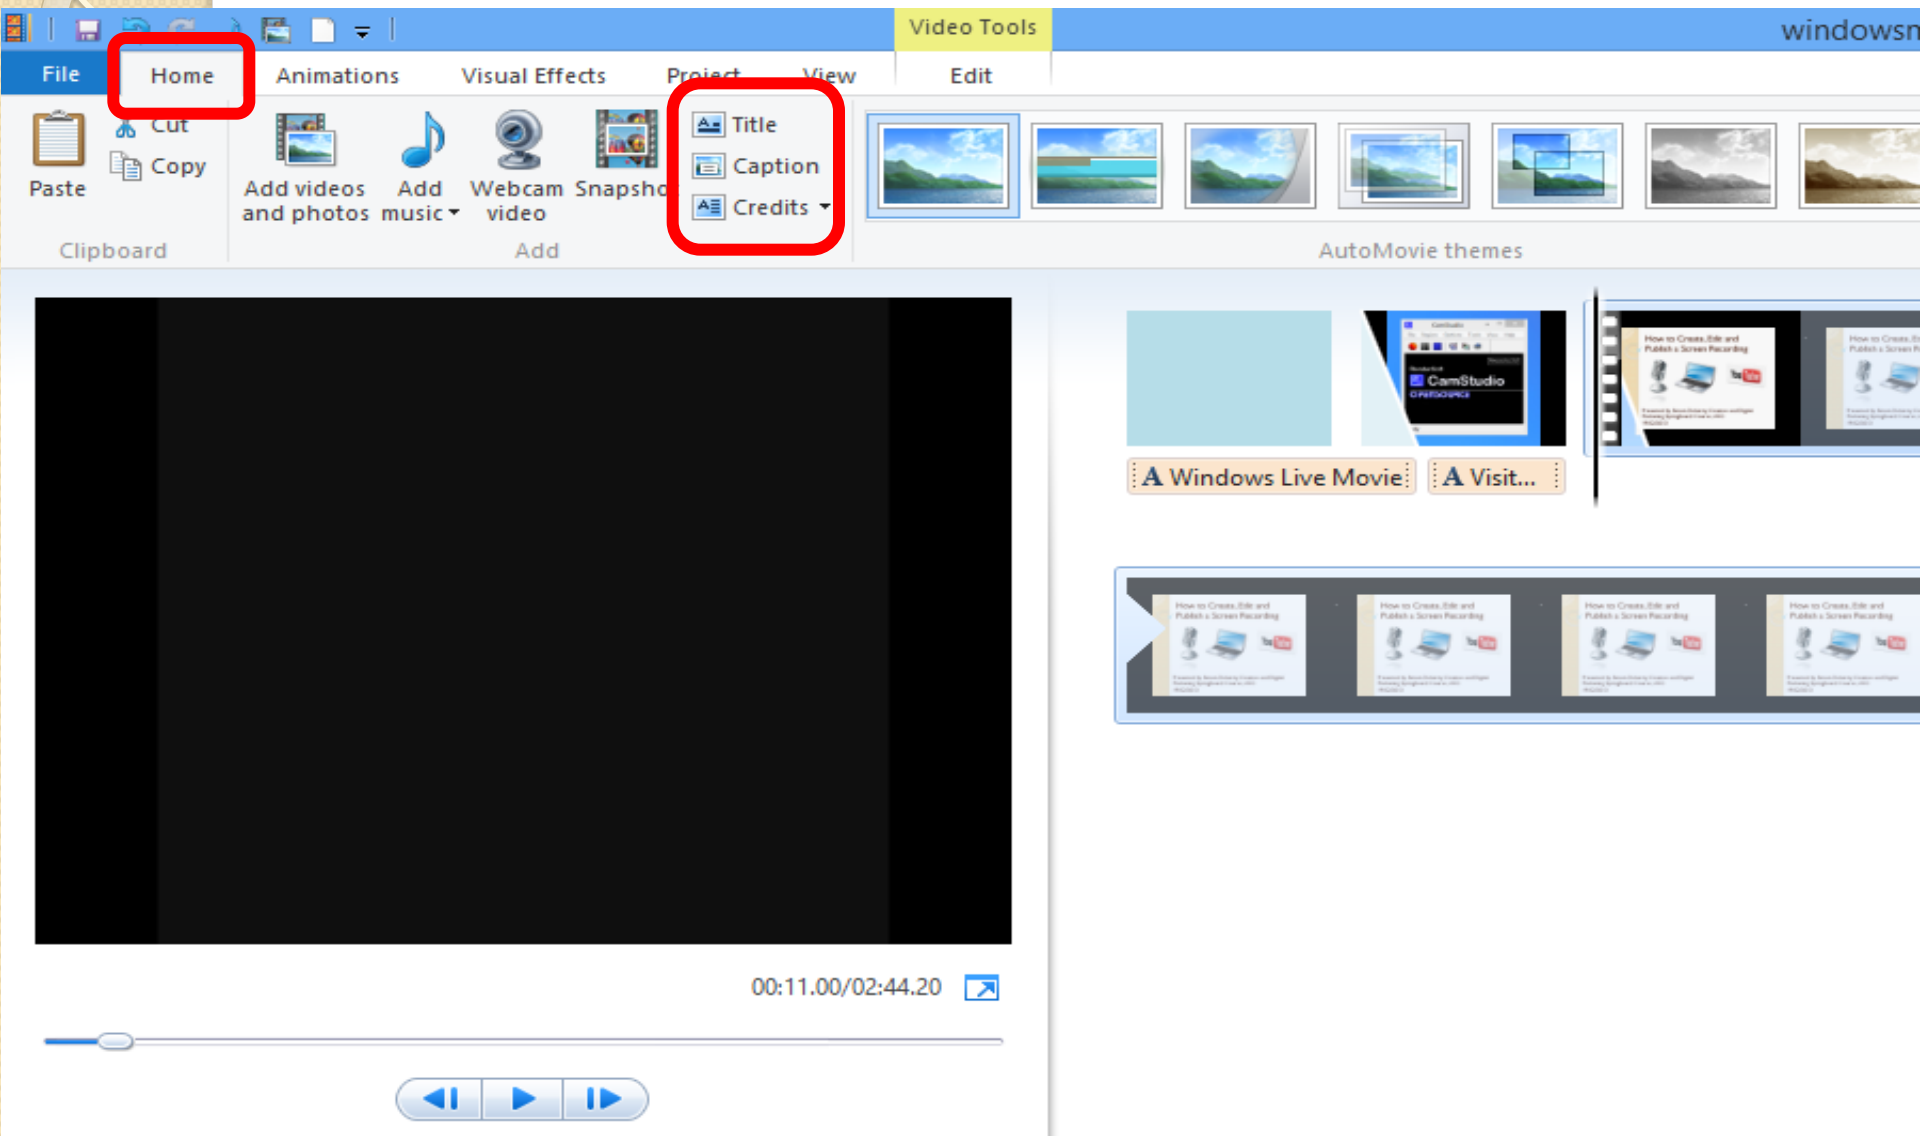

Select Project – Audio mix to change the sound mix between the Music and Voice tracks, this increases the volume of the Voice narration, while proportionally decreasing the volume of the Music track

Select Animations to add animated transition effects between your movie clips

Select Home – Title to add the Opening Title to your movie

Select Format to edit the text font, colour and background of the title

The screenshot displays the Windows Live Movie Maker application window. The 'Format' tab is highlighted in the ribbon, which includes options for text formatting such as font face (Segoe UI), size (36), bold, italic, and background color. The main preview area shows a title card with the text 'Windows Live Movie Maker to edit a CamStudio screen recording' on a black background. The timeline at the bottom indicates a duration of 00:00.00/02:40.20.

File Home Animations Visual Effects Project View Edit **Format**

Clipboard: Paste, Cut, Copy

Font: Segoe UI, 36, Bold, Italic, Underline, Color

Paragraph: Transparency, Bullets, Numbered list, Indent

Adjust: Background color, Start time: 0.00s, Text duration: 7.00

Windows Live Movie Maker to edit a CamStudio screen recording

00:00.00/02:40.20

Select Format to add an animation to your titles

The screenshot displays the Windows Live Movie Maker application interface. The top ribbon includes tabs for File, Home, Animations, Visual Effects, Project, View, Edit, and Format. The 'Format' tab is highlighted with a red rectangle. Within the 'Format' tab, the 'Effects' section shows a row of animation icons, with the 'Slide' effect (depicting a blue arrow pointing right) selected and highlighted by a red rectangle. The 'Adjust' section shows settings for 'Background color', 'Start time' (0.00s), and 'Text duration' (7.00). The main preview area on the left shows a video frame with the text 'Windows Live Movie Maker to edit a CamStudio screen recording' overlaid. The bottom of the interface features a timeline with a playhead at 00:01:24/02:40:20 and standard playback controls (play, pause, stop, previous, next).

00:01:24/02:40:20

Select Home – Credits to add the Credits to your movie

The screenshot displays the Windows Live Movie Maker application window. The title bar reads "windowsmoviemaker - Windows Live Movie Maker". The ribbon menu is set to the "Home" tab, which includes sections for "Clipboard", "Font", "Paragraph", and "Adjust". The "Adjust" section is expanded, showing options for "Background color", "Start time" (158.69s), and "Text duration" (7.00). The "Effects" gallery is visible, showing various transition effects. The main preview area shows a black title card with the text "CREDITS", "Creative and Digital Marketing", "University College Cork", "2013", and "Produced by Simon Doherty". The card is outlined with a red border. The timeline at the bottom shows a single clip labeled "A CREDITS" with a duration of 02:38.70/02:45.70. The playback controls at the bottom include a play button and a progress slider.

Select File – Save movie to save you project

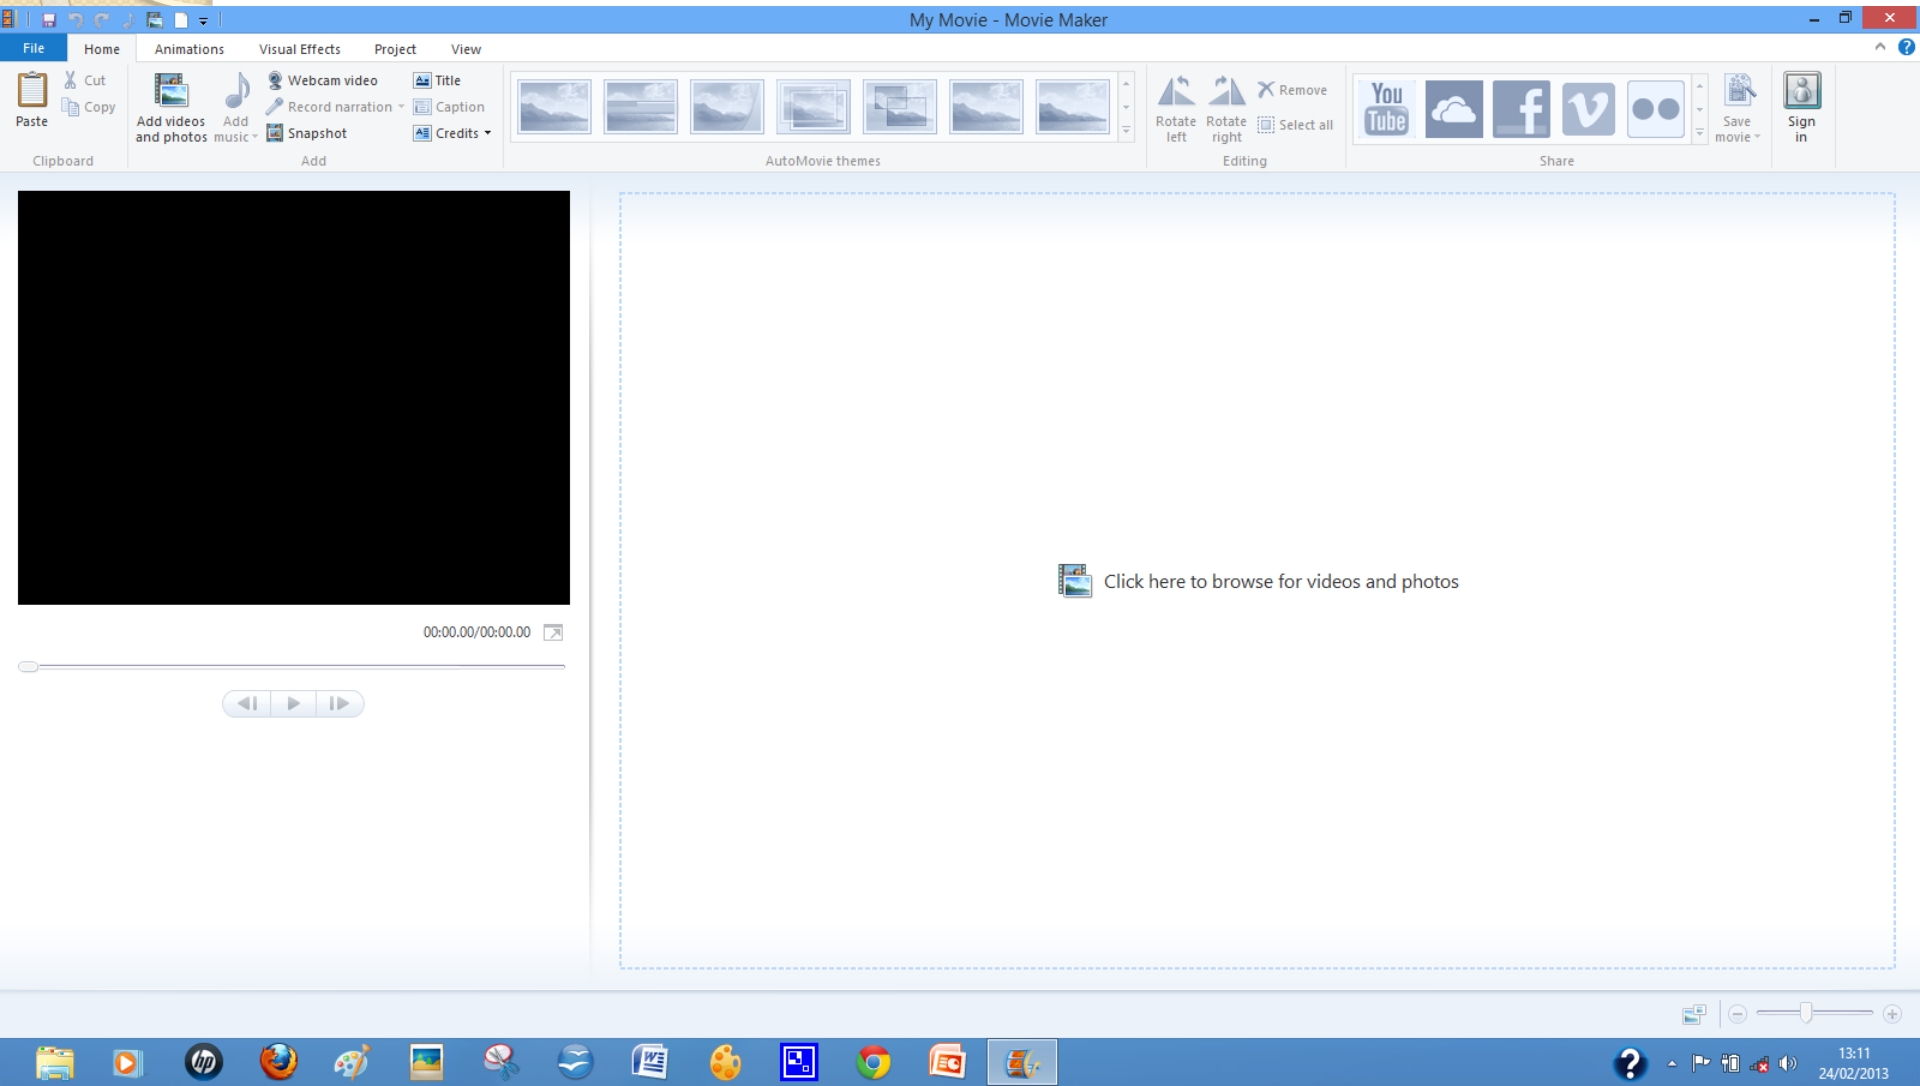

Lesson 1: Wrap-up

- Visit Windows Live and download the latest version of Movie Maker 2012
- Add your photos to the editing window
- **NEW * Record Voice narration ***
- **NEW * Add a music track from the Free Music Archive ***
- Set the start and end points
- Add titles, captions and credits
- Insert transitions
- Save your movie project

Lesson 2: YouTube

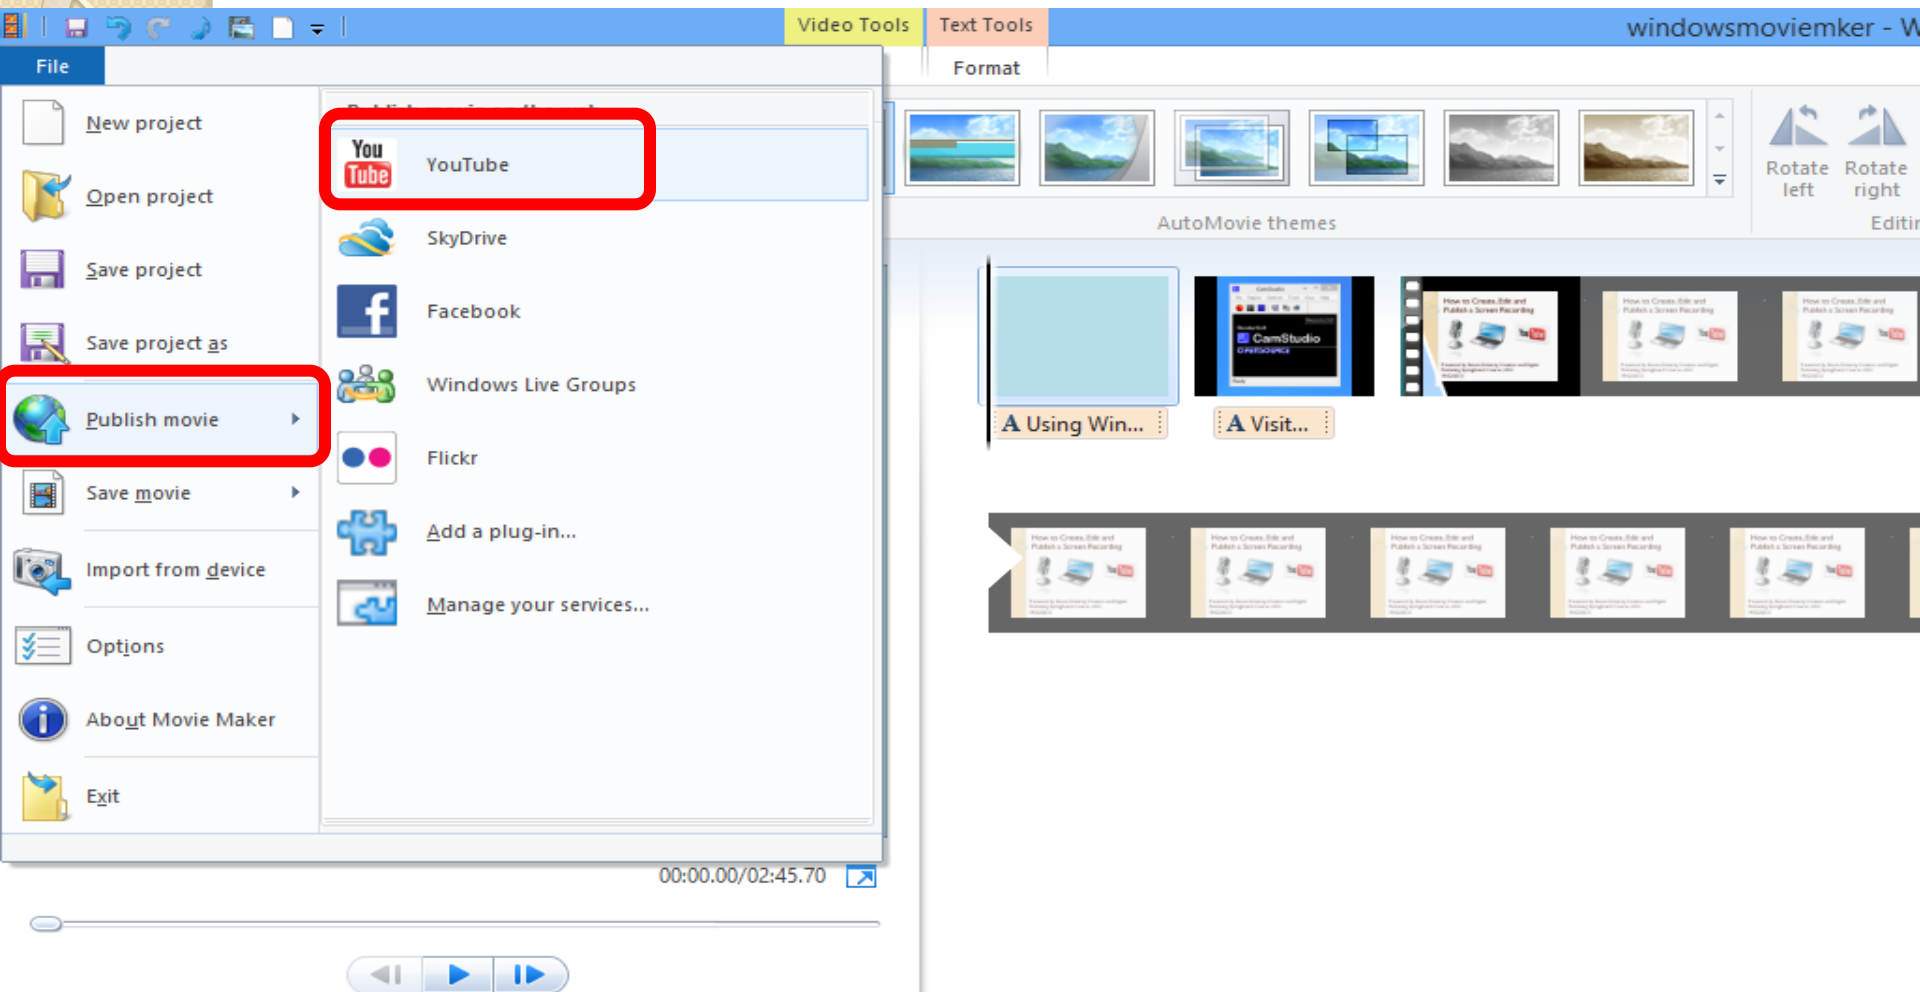

- Connect to the Internet
- Open Windows Live Movie Maker
- Select the movie you want to publish
- Select Publish – YouTube
- Sign in with Windows Live account, or create free account
- Select the Recommended movie size
- Sign into YouTube account
- Edit the title, description, tags, category and permissions
- Publish the movie to YouTube

Launch Windows Live Movie Maker 2012

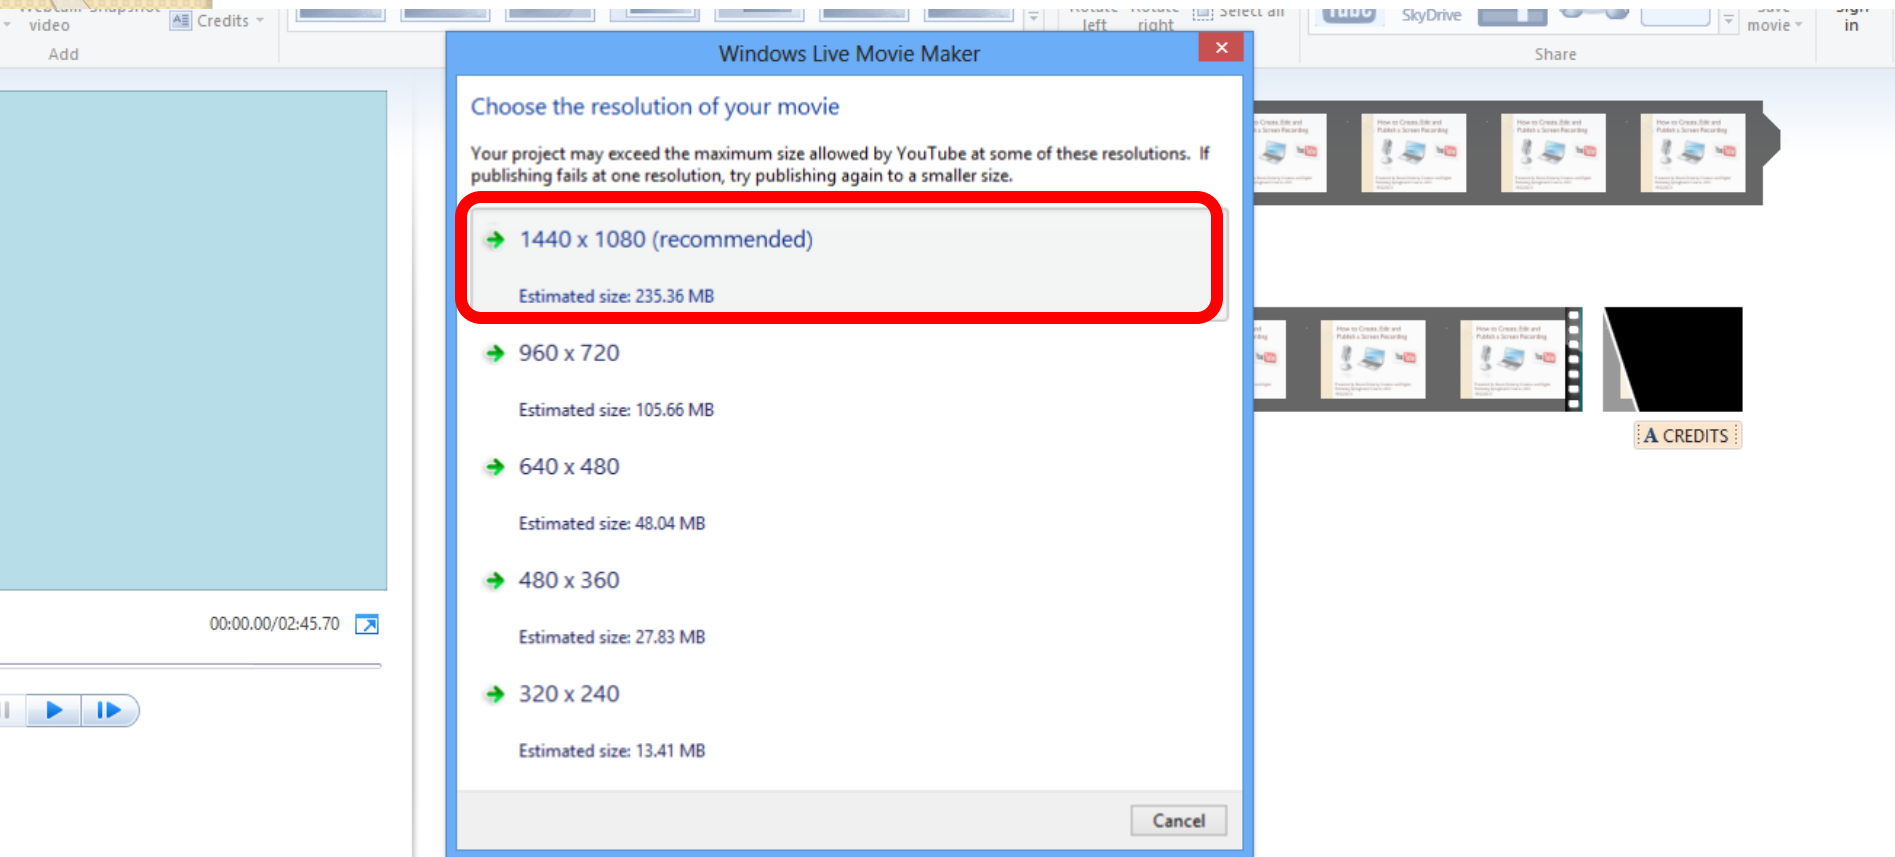

Open the movie project you want to publish

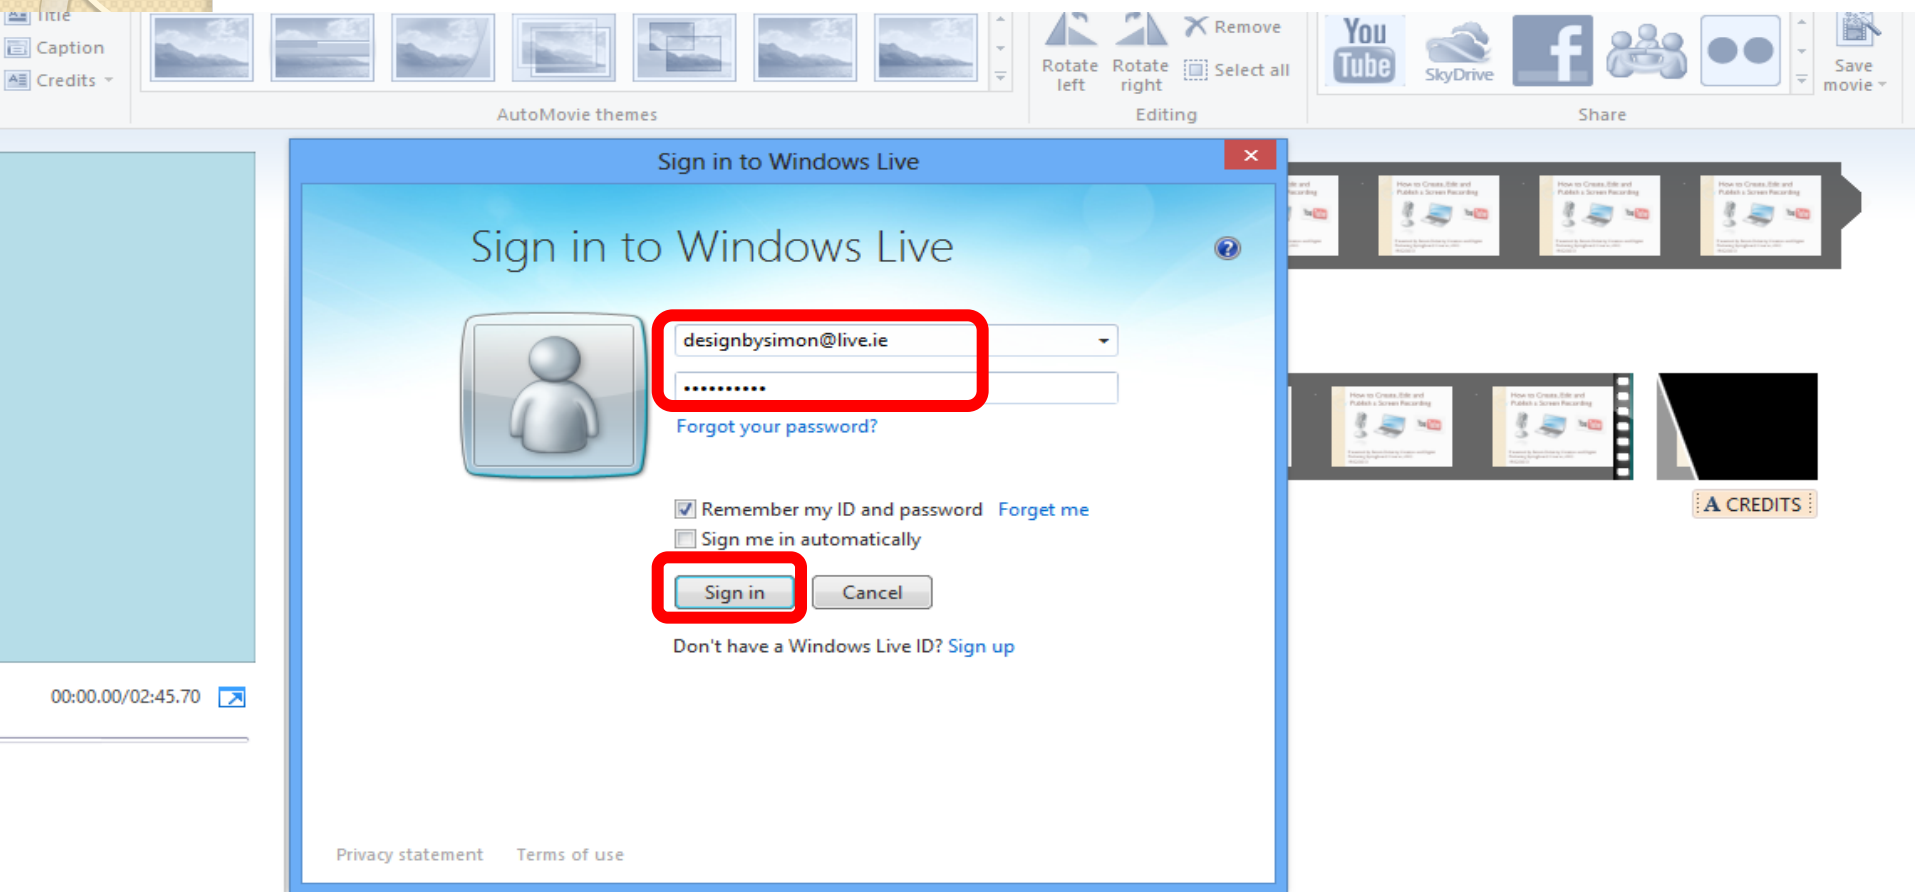

Select Publish - YouTube

Select the Recommended size to publish
YouTube limits movie sizes to less than 2GB gigabytes
or less than 15 minutes duration

Sign in to Windows Live account or create a new account (free)
